Catherine Bauer (1905-64) changed forever the concept of public housing in the United States—and inspired a generation of urban activists to include housing in welfare planning in the mid-20th century. She was one of a small group of idealists who called themselves Housers because of their commitment to raising the quality of urban life through improving shelter for low-income families. In the late 1920s, Bauer spent time in Paris, where she befriended Ferdinand Leger, Man Ray, and Sylvia Beach, publisher of *Ulysses*. Back in New York she fell under the spell of urban critic Lewis Mumford. It was at his urging that she became involved with the architects of change in post-World War I Europe, among them Ernst May, Andre Lurcat, and Walter Gropius. Convinced by their example that good social housing could produce good social architecture and moved by the visible ravages of the depression, she became a passionate leader in the fight for housing for the poor. Soon established through her critical writings as a housing expert, she lodged the issue of public housing firmly within the New Deal's agenda and was instrumental in the creation of the first public housing act in 1937. Her book *Modern Housing*, published in 1934, vividly depicts the essential interdependence of social, economic, and architectural policies in modern life; it is still required college reading. She taught for many years at the University of California Berkeley, as well as Harvard University.

Parmelee shows how presidential primary campaign videocassettes serve many functions for candidates on their road to the White House. These videocassettes, which include images and issues often based on polling data and focus groups, are sent out before the primaries to battleground states to establish an initial image of the candidate. A variety of methods are used to explore the videocassettes of the Democratic and Republican presidential candidates--Gary Bauer, Bill Bradley, George W. Bush, Steve Forbes, Al Gore, and John McCain--who released presidential primary meet the candidate videos during the 2000 race. Frame analysis, quantitative content analysis, and in-depth interviews with the producers of these videos were employed to provide answers to Parmelee's main research question: What function do candidate videos serve in presidential primary campaigns? Findings indicate that these videos, which can run from 5 to 20 minutes in length, serve a clear educational function to explain the candidates' stand on key policy issues. The videos--which are mailed to voters, journalists, and potential donors, and shown to Democratic and GOP faithful at party functions--also serve as fundraisers, surrogate speakers, and inoculators. But, while the videos share some common functions, each campaign targets its video to a slightly different audience based on the campaign's overall strategy. Of particular interest to scholars, students, and other researchers involved with American presidential politics and political communications.

Today's public and private schools can no longer rely on traditional sources of funding to fulfill their educational goals. Although grants have become increasingly popular alternatives for financial support, principals and their staff must face stiff competition for these limited sources. This practical, step-by-step guide is for principals who want to improve their chances of winning grants for their schools. As administrative leaders, principals are in a pivotal position to motivate teachers, parents, and volunteers in the grant-seeking process. This guide provides principals with techniques for mobilizing school staff, coordinating community support, developing winning proposals, constructing realistic plans and budgets, and successfully implementing those grants that have been awarded. David Bauer is not only an educator and former administrator but an expert in grantseeking and fund-raising. He draws from his extensive experience to share useful strategies as well as resources, including worksheets, forms, sample proposal formats, and checklists to measure progress. The grants marketplace can be a tremendous resource for schools who know their way around. This guide helps empower schools and their leaders in resolving their funding problems.

This revised edition of Garland's 1989 publication updates the core bibliography on Gustave Mahler (as well as his spouse and fellow composer Alma Mahler) by incorporating new research gathered over the past dozen years on his life and professional works. Gustave Mahler, renowned conductor and composer of symphonies and song cycles, is one of the foremost musical figures of the late nineteenth and early twentieth centuries. His symphonies continue to be widely performed and studied through the twenty-first century. Organized in sections according to subject matter, references are arranged alphabetically by the names of authors or editors. Filler's research has produced sources for musicologists and students in nineteen languages, offering a resource that expands traditional English-language music scholarship.

In recent years, these religious conservatives have loudly protested a public education system they believe no longer represents their interests or values. Educators often dismiss critiques based on religious values as irrational or flimsy, failing to appreciate the coherence of these criticisms from the Christian Right's own perspective. While the Christian Right has become ever more sophisticated in its lobbying and powerful in its influence, educators and parents find themselves lacking the background knowledge necessary to respond effectively to its efforts. Standing on the Premises of God speaks directly to this dilemma, explaining current incarnations of the Christian Right, its leadership, its intellectual and theological foundations, and its tactics, so that those interested in the debates over education will be better prepared to engage them constructively. Taking the novel approach of framing the Christian Right as a revitalization movement, Detwiler shows how it seeks to effect cultural transformation in order to bring public education and our society more generally in line with its worldview. His theoretical model provides insights into why education is so pivotal to the Christian Right and also assesses the religious viability of the Christian Right as a social movement.

In countless articles on culture, politics, landscape, industry, history, and other topics, the Gartenlaube played an influential role in nineteenth-century Germany's larger effort to forge a national identity for itself. In fact, Belgum argues that the search for, and development of, national identity in Germany was inextricably linked to the writings of the Gartenlaube and other popular magazines. Such publications served both as a public repository of mythic memory for the nation and as a source of new national images for a self-consciously modern Germany.
