Inhaltsangabe:Abstract: In times of severe competition, it is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of the company. This thesis intends to show that a customer-focused quality management is one way to create a sustainable competitive ad-

vantage. Quality controls along the whole value chain -before, during and after production- leads to failure free products, which save costs on the one hand and have thus a positive influence on the company's revenue. On the other hand failure free products that meet the customer's expectations lead to satisfied customers who build up a brand loyalty and conduct retention sales, which have a positive influence on the company's sales, market share as well as the overall image. Furthermore, this thesis points out that it is important to listen to the voice of the customer and get an insight in the customer's needs and wants. To fulfil or even exceed their expectations leads to customer satisfaction, which is a key to success in today's business world. In addition, the customer demands in regard of quality are growing continuously and new technologies are appearing on the markets on a regular basis. Therefore the producers are forced to keep to the latest technology developments and to get hold on the changing customer needs. But even without this external pressure, quality improvement is justified from a cost point of view. The applicability of a customer-oriented quality management is shown in the practical part of this thesis, when the quality of the Saab models is analyzed from the customer's perspective. Due to the arguments, outlined in this thesis, it can be summarized that a quality management with a focus on the needs of the customer should become a core strategy of any company producing and selling products in order to create customer satisfaction and sustain the business. This thesis deals with the field of quality management in the context of customer satisfaction. To show the practical applicability of quality management, this thesis is looking at how quality management is conducted in the automotive industry, as we

compare the Initial Quality Study (IQS) from the market research institute J. D. Power with a survey that was internally conducted at the Saab Automobile AB. Today's business environment creates a growing need for quality management. Tougher competition leads to the demand for cost savings and higher [...]

This is not a book about how to be posh. We have some slightly bigger issues to deal with these days. We've all got a million things to do and are constantly connected to millions of other people all doing a million other things, so the faster we get things done the better, right? Wrong. Among all the busyness and confusion it seems we've forgotten a few of the basics in life, like the ability to treat one another with respect, dignity and some fucking good manners. Enter Simon Griffin, author of *Fucking Apostrophes*. From the entry-level stuff like saying please, thank you and sorry; manspreading on public transport and double-lane queuing at airports, to those that require just a little bit more thought, such as correct urinal protocol in public toilets, making tea rounds in the office and online public displays of affection, Simon imparts rules and advice to living life in a way that makes it just a bit better for everyone. With some liberal use of rude words thrown in to emphasise the point. With chapters on driving, social media, the environment, getting on with your neighbours, and the best manners for a trip to the cinema, this is the perfect gift for a manners enthusiast, or those in need of a gentle (but swearsy) nudge in the right direction.
