The American military-industrial complex and accompanying culture are most often associated with massive weapons procurement programs and advanced technologies. However, one aspect of the complex is not a weapon or even a machine, but one of the world's most highly engineered consumer products: the manufactured cigarette. *Smoke 'Em If You Got 'Em* describes the origins of the often comfortable, yet increasingly controversial relationship among the military, the cigarette industry, and tobaccoland politicians during the twentieth century. *Smoke 'Em If You Got 'Em* is also a study in modern American political economy. Bureaucrats, soldiers, lobbyists, government executives, legislators, litigators, or anti-smoking activists all struggled over far-reaching policy issues involving the cigarette. The soldier-cigarette relationship established by the Army in World War I and broken apart in the mid-1980s underpinned one of the most prolific social, cultural, economic, and healthcare-related developments in the twentieth century: the rise and proliferation of the American manufactured cigarette smoker and the powerful cigarette enterprise supporting them. Using the manufactured cigarette as a vehicle to explore political economy and interactions between the military and American society, Joel R. Bius helps the reader understand this important, yet overlooked aspect of twentieth-century America.

During the Roaring '20s, African Americans rapidly transformed their Chicago into a "black metropolis." In this book, Christopher Robert Reed describes the rise of African Americans in Chicago's political economy, bringing to life the fleeting vibrancy of this dynamic period of racial consciousness and solidarity. Reed shows how African Americans rapidly transformed Chicago and achieved political and economic recognition by building on the massive population growth after the Great Migration from the South, the entry of a significant working class into the city's industrial work force, and the proliferation of black churches. Mapping out the labor issues and the struggle for control of black politics and black business, Reed offers an unromanticized view of the entrepreneurial efforts of black migrants, reassessing previous accounts such as St. Clair Drake and Horace R. Cayton's 1945 study *Black Metropolis*. Utilizing a wide range of historical data, *The Rise of Chicago's Black Metropolis, 1920-1929* delineates a web of dynamic social forces to shed light on black businesses and the establishment of a black professional class. The exquisitely researched volume draws on fictional and nonfictional accounts of the era, black community guides, mainstream and community newspapers, contemporary scholars and activists, and personal interviews.
