This report presents the continent's current state of affairs and forecasts its situation for the coming two years. It examines Africa's performance in crucial areas: macroeconomics, financing, trade policies and regional integration, human development, and governance.

This publication contains a set of guidelines for good practice in the conduct of elections, based on Europe's electoral heritage, as well as an explanatory report which explains the key principles on which they are based. The guidelines and report were adopted in 2002 by the Council for Democratic Elections and by the European Commission for Democracy through Law (also known as the Venice Commission); and approved in 2003 by the Parliamentary Assembly of the Council Europe and by the Congress of Local and Regional Authorities in Europe.

This volume explores the form and function of constitutions in countries without the fully articulated institutions of limited government.

Electronic voting is often seen as a tool for making the electoral process more efficient and for increasing trust in its management. Properly implemented, e-voting solutions can increase the security of the ballot, speed up the processing of results and make voting easier. However, the challenges are considerable. If not carefully planned and designed, e-voting can undermine the confidence in the whole electoral process. Technology upgrades in elections are always challenging projects that require careful deliberation and planning. Introducing e-voting is probably the most difficult upgrade as this technology touches the core of the entire electoral process—the casting and counting of the votes. E-voting greatly reduces direct human control and influence in this process. This provides an opportunity for solving some old electoral problems, but also introduces a whole range of new concerns. Consequently, e-voting usually triggers more criticism and opposition and is more disputed than any other information technology application in elections. This Policy Paper outlines contextual factors that can influence the success of e-voting solutions and highlights the importance of considering these factors before choosing to introduce new voting technologies.

Scrutinizing a relatively new field of study, the Handbook of Politi-

cal Party Funding assesses the basic assumptions underlying the research, presenting an unequalled variety of case studies from diverse political finance systems.

Saltman traces the evolution of voting technology in the USA, from voice to digital, highlighting how the antiquated systems in use today are a legacy of the industrial revolution of the Nineteenth-century and the early computer revolution of the 1950s and analyses the current day situation.

The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken in 2016 by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Volume 1 (A and B) covers international organizations throughout the world, comprising their aims, activities and events.

A seemingly ordinary village participates in a yearly lottery to determine a sacrificial victim.

Today a general mood of pessimism surrounds Western efforts to strengthen elections and democracy abroad. If elections are often deeply flawed or even broken in many countries around the world, can anything be done to fix them? To counter the prevailing ethos, Pippa Norris presents new evidence for why programs of international electoral assistance work. She evaluates the effectiveness of several practical remedies, including efforts designed to reform electoral laws, strengthen women's representation, build effective electoral management bodies, promote balanced campaign communications, regulate political money, and improve voter registration. Pippa Norris argues that it would be a tragedy to undermine progress by withdrawing from international engagement. Instead, the international community needs to learn the lessons of what works best to strengthen electoral integrity, to focus activities and resources upon the most effective programs, and to innovate after a quarter century of efforts to strengthen electoral integrity.

Real-World Electronic Voting: Design, Analysis and Deployment captures all major developments in electronic voting since 2003 in a real-world setting. It covers three broad categories: e-voting

protocols, attacks reported on e-voting and new developments on the use of e-voting. This book explores recent innovations in both poll-site and remote voting systems and their application throughout the world. The requirements of elections are analysed, the available tools and technologies are described, and a variety of modern systems are presented in detail together with discussions of deployments. This is an invaluable resource for election professionals, researchers and policy makers alike. ?Key Features: Reviews both technical and social aspects of e-voting Covers e-voting protocols, attacks reported on e-voting and new developments on the use of e-voting Designed for government election practitioners and policy makers who want to understand the threats and opportunities in e-voting and assess its suitability for future elections

Publisher Description

A safe integration of food and energy production may be one of the best ways to improve national food and energy security and simultaneously reduce poverty in a climate smart way. This study on Integrated Food-Energy Systems (IFES) draws some lessons on constraints to scale up IFES and opportunities to overcome them from examples from Africa, Asia and Latin America as well as from some developed countries.

This handbook provides a general description of the different models of political finance regulations and analyses the relationship between party funding and effective democracy. The most important part of the book is an extensive matrix on political finance laws and regulations for about 100 countries. Public funding regulations, ceilings on campaign expenditure, bans on foreign donations and enforcing an agency are some of the issues covered in the study. Includes regional studies and discusses how political funding can affect women and men differently, and the delicate issue of monitoring, control and enforcement of political finance laws.
