X1G51X - MCMAHON WALLS

These are poems of the natural world, of light and dark and the changing of the seasons. We find Tu Fu chanting a poem deep in the Alaska Range, a man who becomes a bear during his morning walk, a world of light carved from a piece of ivory, and walruses in their home beneath the ocean deciding if they will offer themselves to a hunter. Not all of the poems are set in Alaska. There are poems about growing up in a decaying mill town, the suicide of the poet's mother and how the past is always with us. However, Sexton returns again and again to the conviction that the world itself is sacred -- an ancient belief we need to recover.

Follows little faery Sneezle on his adventures in Spring Cottage as he faces mysterious stick men, an eccentric faery court, a cat, and a human being in his efforts to return home.

Hawkins takes readers on a whirlwind trip of the globe in search of ancient astronomy and a scientific understanding of calendar--

A teenager in 1960s Buffalo kills his mother's abusive lover and becomes the town's legend. The story is told from various points of view, each a projection of a person's fantasies. A look at how and why legends are created.

In turn-of-the-century, upstate New York, a strange, beautiful child who wanders the countryside like a sleepwalker is married off to a coarse, much older farmer. Bitter and increasingly estranged, she falls in love with a tall, black, itinerant water diviner. When the doomed affair ends tragically, she withdraws completely.

The Pontiac Solstice Book traces this remarkable new roadster from beginning to end - conception through development and on into production. This panoramic, oversized (9x12 inches) hardcover books eight chapters, 130 pages and 192 color pictures highlight the GM designers, engineers and managers who trans-

formed Bob Lutz's idea into reality in a record 27 months. The book goes into extensive detail about the turbocharged GXP, V8 conversions, the Solstice as race car, manufacturing processes and what's available in the way of accessories and options. The book's author is engineer/racer/writer Gary Witzenburg. Bob Lutz, GM's global vice chairman, contributed the foreword. If ever you've lusted after a true American sports car and one of Detroit's greater performance bargains, the Solstice is it. Here's a car that's a pleasure to look at and a kick to drive. Read all about it in *The Pontiac Solstice Book*.

Kerry Hardie's second collection extends the wonder, the "small deep awe" of its precursor, *A Furious Place* (available from Dufour). To the calm reflection of "Monaghan Solstice" and other landscapes "lit from elsewhere", she introduces (in "Exiles") a narrative sweep embracing generations and questions of nationality. *Cry for the Hot Belly* recognizes also the appearance of death in the author's life as a familiar vision. Her reconciliation with mortality fosters a new freedom in which she discovers a point of arrival: "I don't have to remember or hold on./ I live this now, it is deep in the life".

Miss Oates turns her piercing eye upon the men and women who people a prestigious upstate college, probing the marriage, affairs, and comic intrigues that lie beneath the school's serene exterior.

This entertaining and illuminating retrospective covers the history of Christmas on television from its inception through the present day, highlighting holiday specials, Christmas episodes of running series, and other programming.

Poetry. Latino/Latina Studies. *MIRRORS FOR GOLD* was written in Mexico City from 1988 to 1992. Today these poems speak directly—perhaps moreso given the time elapsed—to historical duration and the vicissitudes of cultural certainty. The title poem, a numbered series of fifteen pieces, examines the borders between and influences of political climate and intimacy. In the ever-receding present of *MIRRORS OF GOLD*, human debility and bodily promise play out an opulent scenario of surrender and defiance. Paganism is held to be the fastest growing 'religion' in Britain today. Pagan identities and constructions of sacredness contest assumptions of a 'closed' past and untouchable heritage, within a socio-politics in which prehistoric archaeology - the stone circles, burial cairns, and rock art of the British Isles - is itself subject to political and economic threats. Pagans see prehistoric monuments in a living, enchanted landscape of deities, ancestors, spirits, 'wights,' and other non-human agencies to be engaged with for personal and community empowerment. From all areas of Britain and indeed worldwide, people come to sacred sites of prehistory to make pilgrimages, befriend places, give offerings, act as unofficial 'site guardians,' and campaign for 'site welfare.' Summer solstice access at Stonehenge attracts tens of thousands of celebrants. Threats of quarrying near Derbyshire's Nine Ladies stone circle or Yorkshire's Thornborough Henges lead to protests and campaigns for the preservation of sacred landscapes and conservation of plant and animal species. Pagans can be seen as allies to the interests of heritage management, yet instances of

site damage and recent claims for the reburial of non-Christian human remains disrupt the preservation ethos of those who manage and study these sites, and the large-scale celebrations at Stonehenge and Avebury are subject to continual negotiation. In this book, an anthropologist and archaeologist examine interfaces between paganism and archaeology, considering the emergence of 'sacred sites' in pagan and heritage discourse and the implications of pagan involvement for heritage management, archaeology, and anthropology

Poet, novelist, critic, and the winner of the PEN/Malamud Award for lifetime achievement in the short story as an art form, Joyce Carol Oates in this collection offers readers 25 rich, hard-edged stories stamped with her inimitable touch: tales of violence ... or uncertainty ... or with the macabre running like lifeblood through them. In the O. Henry Award-winning title story, "Heat," young twin sisters are murdered, and both they and their killer are remembered by a woman who was their contemporary and, in a way, a victim as well. ... In "Leila Lee," a young woman who marries an older man tries to develop a relationship with her husband's angry teenage son. ... In "House Hunting," a husband perplexed by his disintegrating marriage goes house-hunting with-

out his wife, and embarks on a quest-not only for a house, but for his future. From small towns to big cities, from the working class to the upper class, there is scarcely an aspect of the American experience that Joyce Carol Oates has not magically made her own. Her stories shock, provoke, and astound us with their commentary on the human condition.

Ptolemy's "Almagest" is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

For the past two decades, John Crowley has created some of the most beautiful and evocative fiction written anywhere. A recipient of the prestigious American Academy of Arts and Letters Award for Literature, he has written yet another masterpiece that brings together his distinctive blend of magic, mystery, adventure, and wonder. When the world ends, it ends somewhat differently for each soul then alive to see it; the end doesn't come all at once but passes and repasses over the world like the shivers that pass over a horse's skin. For the people in this novel, the concerns of everyday life -- children and love affairs, work and friendship -- are beginning to transmute into the extraordinary and to reveal the forces, dark and light, that truly govern their lives. So it is for Pierce Moffett, would-be historian and author, who has moved from New York to the Faraway Hills, where he seems to discover - or rediscover -- a path into magic, past and present. And so it is for Rosie Rasmussen, a single mother grappling with her mysterious uncle's legacy and her young daughter Samantha's inexplicable seizures. For Pierce's lover Rose Ryder, whose life is lived half in dream, another path unfolds: she's drawn into a cult that promises to exorcise her demons. A great cycle of time is ending, as it did once before, in the bygone days of witchcraft and wars of religion. The lives of Renaissance wizard John Dee and rogue philosopher Giordano Bruno, who was burned at the stake, haunt the present: their stories, true and false, are being reenacted in the peaceful Faraway Hills and may hold the key to the future. It is the dark of the year, between Halloween and the winter solstice, and the gateway is open between the worlds of the living

and the dead. Pierce and Rosie, Samantha and Rose Ryder, and their enemies and allies -- who have powers hidden until now--- must take sides in an age-old war that is approaching the final battle. Or is it? In a John Crowley novel, nothing is as it seems. Crowley draws us into a cosmic tug-of-war between familiarity and strangeness, couples us with characters much like ourselves, and then works his own potent magic on the proceedings. Dae-monomania is a journey into the very mystery of existence: what is, what went before, and what could break through at any moment in our lives.

The earth is marked with the traces of man's ancient past, and Marilyn Bridges's photographs reveal the spiritual forces inherent in our ancestral creations. Her exploration highlights the mysterious Nazca lines painstakingly scored two thousand years ago onto a Peruvian desert landscape the sacred temples and pyramids of the Maya, deep in the Yucatan jungle the enigmatic earthworks of ancient North American Indians and the colossal prehistoric temple of Stonehenge. Taken from daringly low altitudes, Bridges's aerial photographs pose profound questions about the relationship of human culture and the natural world. Essays by Haven O'More, director of the Institute of Traditional Science, Lucy Lippard, and other leading thinkers lend insight into the quest to uncover lost knowledge of the creation of these mysterious markings.

The World Fantasy Award-winning author of "Od Magic" makes a foray into the modern world with this contemporary fantasy about the tangled lives mortals lead when they turn their eyes from the beauty and mystery that lie just outside of the everyday.

Twenty four short stories all on the themes of marriage and infidelity.

The smooth functioning of an ordered society depends on the possession of a means of regularising its activities over time. That means is a calendar, and its regularity is a function of how well it models the more or less regular movements of the celestial bodies - of the moon, the sun or the stars. Greek and Roman Calendars examines the ancient calendar as just such a time-piece, whose elements are readily described in astronomical and mathematical terms. The story of these calendars is one of a continuous struggle to maintain a correspondence with the regularity of the seasons and the sun, despite the fact that the calendars were usually based on the irregular moon. But on another, more human level, Greek and Roman Calendars steps beyond the merely mathematical and studies the calendar as a social instrument, which people used to organise their activities. It sets the calendars of the Greeks and Romans on a stage occupied by real peo-

ple, who developed and lived with these time-pieces for a variety of purposes - agricultural, religious, political and economic. This is also a story of intersecting cultures, of Greeks with Greeks, of Greeks with Persians and Egyptians, and of Greeks with Romans, in which various calendaric traditions clashed or compromised.

Obsession with loss, fear of betrayal, and sudden violence plague the characters who inhabit these twenty-two stories in Will You Always Love Me? Joyce Carol Oates uses her talent like a scalpel to cut swiftly and precisely through the surface of everyday life to lay bare the powerful, perilous emotional currents swirling below. In the title story, a woman's rage over the savage murder of her sister years ago crowds out all reason and hope of happiness. A respectable suburban matron becomes her son's accomplice in sexually humiliating a glamorous new neighbor in the prize-winning "The Goose-Girl." In all of the stories-characters, male and female, young and old, rich and poor, sophisticated and naive-come to vivid life in a world of dangerous truths and fateful consequences. Joyce Carol Oates's uncanny eye for physical detail, her flawless ear for American speech, and her X-ray vision of the human heart and psyche make the stories she tells indelibly and inescapably real.

Follows a young woman from her early life on the run with her mother to her involvement with a cult and her struggle to free herself of its influence over her.

In these gripping and disturbing tales, women are confronted by

the evil around them and surprised by the evil they find within themselves. With wicked insight, Oates demonstrates why the females of the species are by nature more deadly than the males.

A wealthy and notorious clan, the Bellefleurs live in a region not unlike the Adirondacks, in an enormous mansion on the shores of mythical Lake Noir. Written with a voluptuousness and immediacy unusual even for Oates, *Bellefleur* was hailed upon publication as the culmination of her work. Copyright © Libri GmbH. All rights reserved.

The sixties and seventies witnessed the emergence of Joyce Carol Oates as one of America's foremost writers of the short story. In 1962, 'The Fine White Mist of Winter,' composed when the author was 19 years old, appeared in *The Literary Review* and was selected for both the O. Henry Awards and Best American Short Stories of that year.

"Art historian Carolyn Tate presents, in a well-organized and amply illustrated two-part format, a holistic treatment of a single archaeological site—the great ancient Maya city of Yaxchilan.... This is the most successful attempt to relate [art and architecture] within a Maya site that I have seen." —*Ethnohistory* As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America, other scholars have only a limited time to study and understand the sites before the jungle, weather, and human encroachment efface them again, perhaps forever. This urgency underlies *Yaxchilan: The Design of a Maya Ceremonial City*, Carolyn Tate's comprehensive catalog and analysis of all the city's extant buildings and sculptures. During a year of field work, Tate fully documented the appearance of the site as of 1987. For each

sculpture and building, she records its discovery, present location, condition, measurements, and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds. Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan. More than mere documentation, however, the book explores the phenomenon of art within Maya society. Tate establishes a general framework of cultural practices, spiritual beliefs, and knowledge likely to have been shared by eighth-century Maya people. The process of making public art is considered in relation to other modes of aesthetic expression, such as oral tradition and ritual. This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms, in education in a semiliterate society, and in developing the personal and community identities of individuals. Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period. Individual sculptures are attributed to the hands of single artists and workshops, thus aiding in dating several of the monuments. The significance of headdresses, backracks, and other costume elements seen on monuments is tied to specific rituals and fashions, and influence from other sites is traced. These analyses lead to a history of the design of the city under the reigns of Shield Jaguar (A.D. 681-741) and Bird Jaguar IV (A.D. 752-772). In Tate's view, Yaxchilan and other Maya cities were designed as both a theater for ritual activities and a nexus of public art and social structures that were crucial in defining the self within Maya society.

A New York Times Notable Book and a former Oprah Book Club selection. Moving away from the dark tone of her more recent masterpieces, Joyce Carol Oates turns the tale of a family struggling to cope with its fall from grace into a deeply moving and unforgettable account of the vigor of hope and the power of love to prevail over suffering. The Mulvaneys of High Point Farm in Mt. Ephraim, New York, are a large and fortunate clan, blessed with good looks, abundant charisma, and boundless promise. But over the twenty-five year span of this ambitious novel, the Mulvaneys will slide, almost imperceptibly at first, from the pinnacle of happiness, transformed by the vagaries of fate into a scattered collection of lost and lonely souls. It is the youngest son, Judd, now an adult, who attempts to piece together the fragments of the Mulvaneys' former glory, seeking to uncover and understand the secret violation that occasioned the family's tragic downfall. Each of

the Mulvaneys endures some form of exile--physical or spiritual--but in the end they find a way to bridge the chasms that have opened up among them, reuniting in the spirit of love and healing. Profoundly cathartic, Oates' acclaimed novel unfolds as if, in the darkness of the human spirit, she has come upon a source of light at its core. Rarely has a writer made such a startling and inspiring statement about the value of hope and compassion.

"For thirty-two years archaeologist Julius Gabriel has investigated the Mayan calendar, a 2500-year-old enigma of time and space that predicts humanity will perish at the winter solstice of 2012. Julius believes the Great Pyramid of Giza, Stonehenge, the desert drawings of Nazca, the sites of Angkor Wat, Teotihuacan, and the Kukulcan Pyramid in the Yucatan Peninsula, the site of the ancient asteroid impact, all represent ancient pieces of a global puzzle linked to the salvation of our species."--Jacket.
