## K4G5U1 - ZAVIER CIERRA

conducting a fact-finding investigation, you may suspect that individuals have engaged in criminal conduct. Remember that your organisation is not a criminal investigation organisation and is not equipped to conduct criminal investigations. If these concerns arise, it will be necessary to notify an appropriate criminal investigation

A Guide to Conducting Integrated Baseline Reviews (IBR) 2 self-assessment. The self-assessment should be shared with key stakeholders before the review starts because this may raise areas the review team may wish to focus on. A gap analysis between the two should be part of the post review activities.

Conventional meta-analytic procedures assume that effect sizes are independent. When effect sizes are not independent, conclusions based on these conventional procedures can be misleading or even wrong. Traditional approaches, such as averaging the effect sizes and selecting one effect size per study, are usually used to avoid the dependence of the effect sizes.
