In this era of 'experience economy' and the leisure industry, cities face increasing pressure to distinguish themselves. Ever since Frank Gehry put the city of Bilbao into the international spotlight with his design for the Guggenheim museum, architecture played a more and more important role within this competition between cities. City branding, the planned image or brand of a city, now forms a challenge for architects and urban planners. How do you position a city in a culture dominated by globalization? What are the priorities for inhabitants, companies and investors? Group portraits of young architects 2002 brought together four occasional groups of architects, which each developed a project for two cities in the Netherlands based on city branding. Critical essays on the subject by Berci Florian, Hans Mommaas and Michael Speaks. Koen van Synghel puts the projects in perspective.

THE NEW YORK TIMES BESTSELLER Transform your life using the Bullet Journal Method, the revolutionary organisational system and worldwide phenomenon. The Bullet Journal Method will undoubtedly transform your life, in more ways than you can imagine' Hal Elrod, author of The Miracle Morning In his long-awaited first book, Ryder Carroll, the creator of the enormously popular Bullet Journal organisational system, explains how to use his method to: * **TRACK YOUR PAST:** using nothing more than a pen and paper, create a clear, comprehensive, and organised record of your thoughts and goals. * **ORDER YOUR PRESENT:** find daily calm by prioritising and minimising your workload and tackling your to-do list in a more mindful and productive way. * **PLAN YOUR FUTURE:** establish and appraise your short-term and long-term goals, plan more complex projects simply and effectively, and live your life with meaning and purpose. Like many of us, Ryder Carroll tried everything to get organised - countless apps, systems, planners, you name it. Nothing really worked. Then he invented his own simple system that required only pen and paper, which he found both effective and calming. He shared his method with a few friends, and before long he had a worldwide viral movement. The system combines elements of a wishlist, a to-do list, and a diary. It helps you identify what matters and set goals accordingly. By breaking long-term goals into small actionable steps, users map out an approachable path towards continual improvement, allowing them to stay focused despite the crush of incoming demands. But this is much more than a time management book. It's also a manifesto for what Ryder calls "intentional living": making sure that your beliefs and actions align. Even if you already use a Bullet Journal, this book gives you new exercises to

become more calm and focused, new insights on how to prioritise well, and a new awareness of the power of analogue tools in a digital world. *** This book has been printed with three different colour designs, black, Nordic blue and emerald. We are unable to accept requests for a specific cover. The different covers will be assigned to orders at random. ***

Andy Warhol's explosive Pop Art and sharp commentary on advertising and celebrity culture are renowned and deeply relevant even decades after their creation. Though Warhol himself could be a polarizing figure both personally and professionally, there is no doubt that he was a pioneer of the Pop movement, and today, as a re-

sult, his works regularly fetch astronomical prices. Eric Shiner, Warhol expert and former Andy Warhol Museum director, curates the 100 quintessential, unique works that define the evolution of this illustrious artist, tracing Warhol's dynamic career from the late forties to the end of the eighties and creating a stunning compendium whose pieces, due to their rarity, value, and prestige as part of a museum or other collection, could simply never all be acquired by a single collector.

This is the first examination of women in writing collaborations, which throws new light on partnered creativity, disturbing traditional views of the "author."

Julius Evola was a renowned Dadaist artist, Idealist philosopher, critic of politics and Fascism, 'mystic, ' anti-modernist, and scholar of world religions. Evola was all of these things, but he saw each of them as no more than stops along the path to life's true goal: the realisation of oneself as a truly absolute and free individual living

one's life in accordance with the eternal doctrines of the Primordial Tradition. Much more than an autobiography, The Cinnabar Path in describing the course of Evola's life illuminates how the traditionally-oriented individual might avoid the many pitfalls awaiting him in the modern world. More a record of Evola's thought process than a recitation of biographical facts, one will here find the distilled essence of a lifetime spent in pursuit of wisdom, in what is surely one of his most important works.

The contributors to this volume assess the second Berlusconi government & its policies.

Hailed when it was first published in 1985 as the bible of U.S. collections management, *A Legal Primer on Managing Museum Collections* offers the only comprehensive discussion of the legal questions faced by museums regarding collections. This revised and expanded third edition addresses the many legal developments—including a comprehensive discussion of stolen art and the international movement of cultural property, recent developments in copyright, and the effects of burgeoning electronic uses—that have occurred during the past twenty-five years. An authoritative, go-to book for any museum professional, *Legal Primer* offers detailed explanations of the law, suggestions for preventing legal problems, and numerous case studies of lawsuits involving museum collections.

So what is a bullet journal? It's a planner, to-do list and diary that will help you get your life together! This fun, practical guide shows you how to start and keep a bullet journal: a single notebook in which you write down all the things that you want to remember, or need to do, or you've already done - from every aspect of your life: work, home, relationships and hobbies. With colourful illustrations and easy tips to get you started, early adopter Rachel Wilkerson Miller explains how to make a bullet journal work for you - whether you want to create something simple or elaborate. The phenomenon that is bullet journaling has led to thousands of journalers sharing their work on Pinterest, Instagram and Facebook. In *How to Bullet Plan*, BuzzFeed editor Rachel Wilkerson Miller tells you everything you need to know to start your own.

A landmark biography of the most famous Italian journalist of the twentieth century,

an inspiring and often controversial woman who defied the codes of reportage. Oriana Fallaci is known for her uncompromising vision. To retrace Fallaci's life is to retrace the course of history from World War II to 9/11. As a child, Fallaci enlisted in the Italian Resistance alongside her father, and her hatred of fascism and authoritarian regimes remained strong throughout her life. Covering the entertainment industry early in her career, she created an original, abrasive interview style, focusing on her subjects' emotions, contradictions, and facial expressions more than their words. When she grew bored with movie stars and directors, she turned her attention to the international political figures of the time—Khomeini, Gaddafi, Indira Gandhi, Kissinger—always placing herself front and center in the story. Also a war reporter working wherever there was conflict, she would provoke controversies that became news themselves. With unprecedented access to personal records, Cristina De Stefano brings to life this remarkable woman whose groundbreaking work and torrid love affairs are not easily forgotten. Oriana Fallaci allows a new generation to discover her story and witness the passionate, unstinting journalism so urgently needed in these times of upheaval and uncertainty.

This global status report on prevention and control of NCDs (2014), is framed around the nine voluntary global targets. The report provides data on the current situation, identifying bottlenecks as well as opportunities and priority actions for attaining the targets. The 2010 baseline estimates on NCD mortality and risk factors are provided so that countries can report on progress, starting in 2015. In addition, the report also provides the latest available estimates on NCD mortality (2012) and risk factors, 2010-2012. All ministries of health need to set national NCD targets and lead the development and implementation of policies and interventions to attain them. There is no single pathway to attain NCD targets that fits all countries, as they are at different points in their progress in the prevention and control of NCDs and at different levels of socioeco-

conomic development. However all countries can benefit from the comprehensive response to attaining the voluntary global targets presented in this report.--Publisher description.

Hidden in Plain Sight: Covert Criticism of the Medici in Renaissance Florence offers the first systematic study of an important and heretofore insufficiently-studied phenomenon in Renaissance Europe. Through a close examination of a wide variety of visual and textual materials, James O. Ward illuminates the means by which Florentine citizens--among them several of the most famous artists and writers of the time, such as Michelangelo, Machiavelli, and Vasari--managed, in an increasingly authoritarian political and cultural climate, to express their disaffection with the prevailing political and cultural status quo in relatively safe ways, while at the same time maintaining contact with those rulers whom they criticized, upon whom they often depended for their livelihoods. Ward's volume thus offers new and provocative interpretations of some of the most famous works of Italian Renaissance visual and textual culture--for example, Michelangelo's New Sacristy in Florence, Machiavelli's Prince, and Vasari's portrait of Lorenzo de' Medici--which have traditionally been viewed by scholars of the period as encomiastic celebrations of their patrons' power and prestige. The volume thus provides--besides its intimate view of power relations between some of Florence's most creative artists and writers and those they served--fresh perspectives on the important question of patron-artist relations during the period. Written in a style which is not too technical, the book is an ideal resource for specialists in Italian history, art history, literature, rhetoric, theatre studies, and the history of Italian academies, as well as a stimulating narrative for the educated general reader interested in the history of Florence, and its often fraught relations with its leading family, the Medici.

This publication evaluates the institutional record on conflict prevention, identifies current trends in conflict prevention practice, and makes recommendations on improving organizational capacity. The first part of the book addresses the question: What is successful conflict prevention? The se-

cond part reflects on how existing mechanisms and instruments for conflict prevention can be properly evaluated and improved, focusing on institutions at the forefront of conflict prevention policy such as EU, the OSCE and NATO. The contributors to this book are a diverse group of individuals involved in conflict prevention activities including, scholars from developed and developing countries, and practitioners with insights on the work of regional organizations and the United Nations.

In Cents and Sensibility, an eminent literary critic and a leading economist make the case that the humanities--especially the study of literature--offer economists ways to make their models more realistic, their predictions more accurate, and their policies more effective and just. Arguing that Adam Smith's heirs include Austen, Chekhov, and Tolstoy as much as Keynes and Friedman, Gary Saul Morson and Morton Schapiro trace the connection between Adam Smith's great classic, *The Wealth of Nations*, and his less celebrated book on ethics, *The Theory of Moral Sentiments*. The authors contend that a few decades later, Jane Austen invented her groundbreaking method of novelistic narration in order to give life to the empathy that Smith believed essential to humanity. More than anyone, the great writers can offer economists something they need--a richer appreciation of behavior, ethics, culture, and narrative. Original, provocative, and inspiring, *Cents and Sensibility* demonstrates the benefits of a dialogue between economics and the humanities and also shows how looking at real-world problems can revitalize the study of literature itself. Featuring a new preface, this book brings economics back to its place in the human conversation.

The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European le-

gacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

Domestic materiality in a remarkable European city How did citizens in Bruges create a home? What did an ordinary domestic interior look like in the sixteenth century? And more importantly: how does one study the domestic culture of bygone times by analysing documents such as probate inventories? These questions seem straightforward, yet few endeavours are more challenging than reconstructing a sixteenth-century domestic reality from written sources. This book takes full advantage of the inventory and convincingly frames household objects in their original context of use. Meticulously connecting objects, people and domestic spaces, the book introduces the reader to the rich material world of Bruges citizens in the Renaissance, their sensory engagement, their religious practice, the role of women, and other social factors. By weaving insights from material culture studies with urban history, *At Home in Renaissance Bruges* offers an appealing and holistic mixture of in-depth socio-economic, cultural and material analysis. In its approach the book goes beyond heavy-handed theories and stereotypes about the exquisite taste of aristocratic elites, focusing instead on the domestic materiality of Bruges' middling groups. Evocatively illustrated with contemporary paintings from Bruges and beyond, this monograph shows a nuanced picture of domestic materiality in a remarkable European city.

The best-selling illustrated desk diary from the RHS.

Many coastal communities have built structures at their beaches and added quantities of sand in contoured designs to combat erosion. Are such beach nourishment projects technically and economically sound? Or are they nothing more than building sand castles, as critics claim? *Beach Nourishment and Protection* provides a sound technical basis for decision-making, with recommendations regarding the utility of beach nourishment, the appropriate role of federal agencies, responsibility for cost, design methodology, and other issues. This volume: Examines the economic and social role of beaches, the history of beach nourishment projects, and management strategies for shore protection. Discusses the role of the U.S. Army Corps of Engineers and other federal agencies, with a close-up look at the federal flood insurance program. Explores the state of the art in project design and prediction of outcomes, including the controversy over the

use of traditional and nontraditional shore protection devices. Addresses what is known about the environmental impacts of beach nourishment. Identifies what outcomes should be targeted for continued monitoring by project officials. Beach Nourishment and Protection provides insight into the technical, economic, environmental, and policy implications of beach nourishment and protection, with examples and suggested research directions.

At the beginning of World War II, Prince Junio Valerio Borghese, dashing Italian nobleman, assembled the famous Decima MAS naval unit—the first modern naval commando squad. Borghese's "frogmen" were trained to fight undercover and underwater with small submarines and assault boats armed with a variety of destructive torpedoes. The covert tactics he and the Decima MAS developed, including the use of midget submarines, secret nighttime operations, and small teams armed with explosives, have become a standard for special forces around the world to this very day. After the Italian capitulation in 1943, Borghese determinedly fought on as a Fascist commando leader. After the war, he became a man of mystery, variously said to be involved with several right-wing conspiracies, abortive coups, and clandestine activity. The Prince's death in 1974 was every bit as mysterious as his life. Greene and Massignani have drawn upon official archives as well as information from Allied and Axis veterans in an unprecedented attempt to separate fact from fantasy in this detailed examination of Borghese, the Decima MAS, and the Italian naval special forces.

This groundbreaking book explores the interpretative potential and analytical capacity of the concept 'fascist warfare'. Was there a specific type of war waged by fascist states? The concept encompasses not only the practice of violence at the front, but also war culture, the relationship between war and the fascist project, and the construction of the national community. Starting with the legacy of the First World War and using a transnational approach, this collection presents case studies of fascist regimes at war, spanning Nazi Germany, Fascist Italy, Francoist Spain, Croatia, and Imperial Japan. Themes include the idea of rapid warfare as a symbol of

fascism, total war, the role of modern technology, the transfer of war cultures between regimes, anti-partisan warfare as a key feature, and the contingent nature and limits of fascist warfare.

Enhancing the Contribution of Sport to the Sustainable Development Goals builds on the work of previous Commonwealth publications analysing the role of sport in achieving sustainable development. Aimed at governmental policy-makers and other stakeholders, it provides evidenced and balanced policy options supporting the effective contribution of sport towards six prioritised Sustainable Development Goals (SDGs).

Media Activism in the Digital Age captures an exciting moment in the evolution of media activism studies and offers an invaluable guide to this vibrant and evolving field of research. Victor Pickard and Guobin Yang have assembled essays by leading scholars and activists to provide case studies of feminist, technological, and political interventions during different historical periods and at local, national, and global levels. Looking at the underlying theories, histories, politics, ideologies, tactics, strategies, and aesthetics, the book takes an expansive view of media activism. It explores how varieties of activism are mediated through communication technologies, how activists deploy strategies for changing the structures of media systems, and how governments and corporations seek to police media activism. From memes to zines, hacktivism to activism, this volume considers activist practices involving both older kinds of media and newer digital, social, and network-based forms. Media Activism in the Digital Age provides a useful cross-section of this growing field for both students and researchers.

A revealing study of the sensual tensions powering the period's formal and ideological innovations.
