There was no clue to the kidnapping of wealthy, powerful men and beautiful, talented women—until the Man Who Dealt in Death broke into Richard Wentworth's stroll in the moonlight with the wanton wounding of his own lookout. From that stricken gangster Wentworth obtained the first hint of the devil-brain that was using science and surgery, death and torture and extortion, to enslave the city's great. And Wentworth, better known as the Spider, answered the challenge of the Laboratory of the Lost—gambling life and more against weird dangers that no man had ever faced before!

"This Circular establishes Federal policy regarding the performance of commercial activities," i.e., Federal policy on whether government agencies should produce goods and services in-house or contract them out to commercial sources. Cf. pp. 1-2.

Discussing the profound changes and possibilities for writing and writing instruction that are evident at this stage of the computer revolution, this book contains 17 articles which focus on implications for teaching, learning, and teacher education and highlight questions that teachers and researchers must address to realize the potential of the new technology. The book's four main sections deal with the profound influence of the new electronic age on teachers' lives, the ways computers change the responsibilities of students and teachers, the significance of hypertext for writers and teachers, and the political implications of the computer revo-

lution for education. The articles and their authors are as follows: "Ideology, Technology, and the Future of Writing Instruction" (Nancy Kaplan); "Taking Control of the Page: Electronic Writing and Word Publishing" (Patricia Sullivan); "Computing and Collaborative Writing" (Janis Forman); "Prospects for Writers' Workstations in the Coming Decade" (Donald Ross); "Computers and Teacher Education in the 1990s and Beyond" (Kathleen Kiefer); "Computers and Instructional Strategies in the Teaching of Writing" (Elizabeth Klem and Charles Moran); "Evaluating Computer-Supported Writing" (Andrea W. Herrmann); "Hypertext and Composition Studies" (Henrietta Nickels Shirk); "Toward an Ecology of Hypermedia" (John McDaid); "Reconceiving Hypertext" (Catherine F. Smith); "The Politics of Hypertext" (Stuart Moulthrop); "Technology and Authority" (Ruth Ray and Ellen Barton); "The Politics of Writing Programs" (James Strickland); "The Equitable Teaching of Composition with Computers: A Case for Change" (Mary Louise Gomez); and "Feminism and Computers in Composition Instruction" (Emily Jessup). The Department of Defense operates in a challenging natural environment stretching from the surface of the earth into the far reaches of space. While the environment has beleaguered military operations for centuries, it has also provided strategic, operational, and tactical advantage to the forewarned. Sun Tzu once proclaimed, "Know the ground, know the weather; your victory will be total." Indeed, history has shown that commanders who have exploited knowledge of the environment and its effects have been rewarded with victory, while those who have ignored the en-

vironment have often met with failure.

Since the 1950s, a number of specialized books dealing with human factors has been published, but very little in aviation. Human Factors in Aviation is the first comprehensive review of contemporary applications of human factors research to aviation. A "must" for aviation professionals, equipment and systems designers, pilots, and managers—with emphasis on definition and solution of specific problems. General areas of human cognition and perception, systems theory, and safety are approached through specific topics in aviation—behavioral analysis of pilot performance, cockpit automation, advancing display and control technology, and training methods.

Effective safety management has always been a key objective for the broader airworthiness sector. This book is focused on safety themes with implications on airworthiness management. It offers a diverse set of analyses on aircraft maintenance accidents, empirical and systematic investigations on important continuing airworthiness matters and research studies on methodologies for the risk and safety assessment in continuing and initial airworthiness. Overall, this collection of research and review papers is a valuable addition to the published literature, useful for the community of aviation professionals and researchers.

In this shrewd and fascinating book, the renowned scholar and former foreign minister Jorge Castañeda sheds much light on the puzzling paradoxes of politics and culture of modern Mexico. Here's a nation of 110 million that has an ambivalent and complicated relationship with the United States yet is host to more American expatriates than any country in the world. Its people tend to resent foreigners yet have made the nation a hugely popular tourist destination. Mexican individualism and individual ties to the land reflect a desire to conserve the past and slow the route to uncertain modernity. Castañeda examines the future possibilities for Mexico as it becomes more diverse in its regional identities, socially more homogenous, its character and culture the instruments of change rather than sources of stagnation, its political system more open and democratic. *Mañana Forever?* is a compelling portrait of a nation at a crossroads.
