A journey back through the music, madness, and unparalleled freedom of an era of change—the '70s—as told through the life of ultra-fabulous superstar Sylvester. Imagine a piper singing in a dazzling falsetto, wearing glittering sequins, and leading the young people of the nation to San Francisco and on to liberation where nothing was straight-laced or old-fashioned. And everyone, finally, was welcome-to come as themselves. This is not a fairy tale. This was real, mighty real, and disco sensation Sylvester was the piper. Joshua Gamson—a Yale-trained pop culture expert—uses him, a boy who would be fabulous, to lead us through the story of the '70s when a new era of change liberated us from conformity and boredom. Gamson captures the exuberant life, feeling,

energy, and fun of a generation's wonderful, magical waking up-from the parties to the dancing and music. The story begins with a little black boy who started with nothing but a really big voice. We follow him from the Gospel chorus to the glory days in the Castro where a generation shook off its shame as Sylvester sang and began his rise as part of a now-notorious theatrical troupe called the Cockettes. Celebrity, sociology, and music history mingle and merge around this endlessly entertaining story of a singer who embodied the freedom, spirit, and flamboyance of a golden moment in American culture.

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual spring-

time floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.
