This set of games asks students to find the correct equation of the parabola in order to hit the pig! Three set of coordinates are given and students are required to calculate the equation of the parabola. They will be required to understand the equation of a quadratic, in particular the form $y=a(x-p)(x-q)$ would be helpful. Great fun!

Before assigning the project, I did give my kids a "real world" warmup problem that I found on the lovely pinterest via teacherspayteachers. This was a great introduction as it allowed for the kids to discuss with me why negative x and y values shouldn't matter in these contexts (allowing for points to be deducted in the angry birds projects, mwahaha).
