*Apple Display 27 for sale | eBay*

The Apple Cinema Display is a line of flat-panel computer monitors developed and sold by Apple Inc. between 1999 and 2011. It was initially sold alongside the older line of Studio Displays, but eventually replaced them. Apple offered 20-, 22-, 23-, 24-, 27- and 30-inch sizes, with the last model being a 27-inch size with LED backlighting. There have been three designs for the Cinema Display, one featuring polycarbonate plastic and two featuring anodized aluminum. The first displays were designed

It's Apple, it's expensive, but having reviewed and considered for about 6 months the Dell High end displays ( which are very good too ) I decided to go for the Apple Cinema Display [ACD] 27". Reason - clarity of image, sound output quality and it physically matches the iMac 27".
