A European lately arrived in China, if he is of a receptive and reflective disposition, finds himself confronted with a number of very puzzling questions, for many of which the problems of Western Europe will not have prepared him. Russian problems, it is true, have important affinities with those of China, but they have also important differences; moreover they are decidedly less complex.

Television has long been a symbol of social and cultural decay, yet many in postwar Europe saw it as the medium with the greatest potential to help build a new society and create a new form of audiovisual art. Utopian Television examines works of the great filmmakers Roberto Rossellini, Peter Watkins, and Jean-Luc Godard, all of whom looked to television as a promising new medium even while remaining critical of its existing practices. Utopian Television illustrates how each director imagined television's improved or "utopian" version by drawing on elements that had come to characterize it by the early 1960s. Taking advantage of the public service model of Western European broadcasting, each used television to realize works that would never have been viable in the commercial cinema. All three directors likewise seized on television's supposed affinity for information and its status as a "useful" medium, but attempted to join this utility with aesthetic experimentation, suggesting new ways to conceive of the relationship between aesthetics and information. As beautifully written as it is theoretically rigorous, Utopian Television turns to the writing of Fredric Jameson and Ernst Bloch in treating the three directors' television experiments as enactments of "utopia as method." In doing so it reveals the extent to which the medium inspired and shaped hopes not only of a better future but of better moving image art as well.

Explores the influence of Russian aesthetics on British modernistsIn what ways was the British fascination with Russian arts,

politics and people linked to a renewed interest in the unseen? How did ideas of Russianness and 'the Russian soul' - prompted by the arrival of the Ballets Russes and the rise of revolutionary ideals - attach themselves to the existing British fashion for theosophy, vitalism and occultism? In answering these questions, this study is the first to explore the overlap between Slavophilia and mysticism between 1900 and 1930 in Britain. The main Russian characters that emerge are Fedor Dostoevsky, Boris Anrep, Vasily Kandinsky, Petr Ouspensky and Sergei Eisenstein. The British modernists include Roger Fry, Virginia Woolf, Mary Butts, John Middleton Murry, Michael Sadleir and Katherine Mansfield. Key Features: Draws on unpublished archive material as well as on periodicals, exhibition catalogues, reviews, diaries, fiction and the visual artsAddresses the omission in modernist studies of the importance of Russian aesthetics and Russian discourses of the occult to British modernismChallenges the dominant Western European and transatlantic focus in modernist studies and provides an original contribution to our understanding of new global modernismsCombines literary studies with aesthetics, modernist history, the history of modern esotericism, film history, periodical studies and science studies

Many scholars have tried to assess Adolf Hitler's influence on the German people, usually focusing on university towns and industrial communities, most of them predominately Protestant or religiously mixed. This work by Walter Rinderle and Bernard Norling, however, deals with the impact of the Nazis on Oberschopfheim, a small, rural, overwhelmingly Catholic village in Baden-Wuerttemberg in southwestern Germany. This incisively written book raises fundamental questions about the nature of the Third Reich. The authors portray the Nazi regime as considerably less "totalitarian" than is commonly assumed, hardly an exemplar of the efficiency for which Germany is known, and neither revered nor condemned by most of its inhabitants. The authors suggest that Oberschopfheim merely accepted Nazi rule with the same resignation with which so many ordinary people have regarded their governments throughout history. Based on village and county records and on the direct testimony of Oberschopfheimers, this book will interest anyone concerned with contemporary Germany as a growing economic power and will appeal to the descendants of German immigrants to the United States because of its depiction of several generations of life in a German village.

Cuts across perceptual psychology, art, television, film, literature, advertising, and political communication to give the reader critical insight into the holistic logic and emotional power of the images that dominate our lives.

An eminent historian recounts the Nazi rise to power from his unique perspective as a Jewish boy growing up in Munich with Adolf Hitler as his neighbor. Edgar Feuchtwanger came from a prominent German Jewish family: the only son of a respected editor, and the nephew of best-selling writer Lion Feuchtwanger. He was a carefree five-year-old, pampered by his parents and his nanny, when Adolf Hitler, the leader of the Nazi Party, moved into the

building across the street in Munich. In 1933 his happy young life was shattered. Hitler had been named Chancellor. Edgar's parents, stripped of their rights as citizens, tried to protect him from increasingly degrading realities. In class, his teacher had him draw swastikas, and his schoolmates joined the Hitler Youth. From his window, Edgar bore witness to the turmoil surrounding the Night of the Long Knives, the Anschluss, and Kristallnacht. Jews were arrested; his father was imprisoned at Dachau. In 1939 Edgar was sent on his own to England, where he would make a new life, start a career and a family, and try to forget the nightmare of his past—a past that came rushing back when he decided, at the age of eighty-eight, to tell the story of his buried childhood and his infamous neighbor.

This is the first full-length study in any language of the most significant film director of Italian Neorealism. Peter Brunette combines close analyses of Roberto Rossellini's formal and narrative style with a thorough account of his position in the political and cultural landscape of postwar Italy. More than forty films are explored, including *Open City*, *Paisan*, *Voyage to Italy*, *The Rise to Power of Louis XIV*, and films made in the director's later years that documented crucial epochs in human history. Brunette's book is based on eight years of research, during which he interviewed members of the director's family as well as Rossellini himself. Brunette also draws on an enormous body of European and American criticism and discusses the various intellectual debates spawned by the director's work. This landmark study is both a comprehensive introduction to one of the most influential practitioners of the contemporary cinema and a boldly original discussion of Italian Neorealism. A classic of World War II literature, an incredibly revealing work that provides a near comprehensive account of the war and brings to life the legendary general and eventual president of the United States. Five-star General Dwight D. Eisenhower was arguably the single most important military figure of World War II. Crusade in Europe tells the complete story of the war as he planned and executed it. Through Eisenhower's eyes the enormous scope and drama of the war--strategy, battles, moments of great decision--become fully illuminated in all their fateful glory. Penned before his Presidency, this account is deeply human and helped propel him to the highest office. His personal record of the tense first hours after he had issued the order to attack leaves no doubt of his travails and reveals how this great leader handled the ultimate pressure. For historians, his memoir of this world historic period has become an indispensable record of the war and timeless classic.
