Ninja Squad's awesome blog. This is a big progress compared to previous Angular versions. We used to have to build the same application for every locale, as the translation was part of the compilation. Angular has the latest version called Angular 6 before we jump to latest version, it would be more fun if we started from Angular 1 so we can understand flow/architecture of the angular itself. Basically, it is like variable built-in angular. Okay so that's it! Part 1 of become a ninja with Angular.

One of the new features of Angular 8 is the possibility to (more easily) build your CLI application with Bazel. Bazel is a build tool developed and massively used by Google, as it can build pretty much any language. The Angular framework itself is built with Bazel.
