Bruner Vs. Vygotsky: An Analysis Of Divergent Theories ...

What teachers should be doing B.F. SKinners work with "reinforcers" and "punishers" has given teachers new insight into student motivation and behavior. As explained by Woolfolk (2013), "When individuals are learning a new behavior, they will learn faster if they are reinforced

Bruner built on Vygotsky's social constructional theory from the 1930's which fell into three general claims; higher mental functioning in the individual emerged out of social processes (culture), secondly, social and psychological processes are fundamentally shaped by cul-

tural tools (language) and lastly, the developmental method Zone of ...

Bruner Vs Vygotsky An Analysis

Bruner Jerome Bruner was an American psychologist who became a leading figure in 'cognitive' psychology in the 1950's. There were three considerable dissimilarities in their approaches which included the adult's role, language and the cognitive development stages idea.

Jerome Bruner - Wikipedia

Bruner's theory of scaffolding emerged around 1976 as a part of social constructivist theory, and was particularly influenced by the work of Russian psychologist Lev Vygotsky. Vygotsky argued that we learn best in a social environment, where we con-

struct meaning through interaction with others.

"Both Bruner and Vygotsky believed that higher cognitive functions develop more fully with the development of language" (Diaz, 1988, p.10). Both Piaget and Vygotsky believed that knowledge acquisition takes place in stages. In others words, it is difficult for a person to acquire sound knowledge about a topic in the first stage itself.
