Biology Chapter Excerpt - KendallHunt

BSCS Biology: An Ecological Approach provides several assessment items related to two of the key ideas for cell structure and function and no items for the other three key ideas. However, all of the relevant assessment items require only that the student provide the appropriate term for the function described in the question.

Bscs Biology An Ecological Approach

BSCS Biology: An Ecological Approach, p. 82s. This passage provides an appropriate link between proteins doing the work of the cell and the need for the proper temperature and pH. This book explains that the work of enzymes depends on its fit with other molecules, thus if the shape is changed, its ability to do work is changed.

BSCS Biology: An Ecological Approach. [This program] encourages you to investigate how organisms and their behaviors are shaped by their environments. You will ask questions about what happens as organisms and their environments interact. You will be introduced to the big pictures showing how different local environments fit together to form patterns of life on Earth.-Foreword.

BSCS Biology: An Ecological Approach - Biological Sciences ...

BSCS Biology: An Ecological Approach provides ten assessment items for one of the key ideas but provides no assessment items for most of the other ideas. The relevant items in the test bank (shown below) mostly assess understanding of the idea that "At each link in a food web, some energy is stored in newly made structures but much is dissipated into the environment as heat.

During photosynthesis, they use the energy in sunlight to make sugars from carbon dioxide and water. In this way, the energy from sunlight and the carbon from carbon dioxide are stored in the sugars. The sugars created during photosynthesis can be used in four ways by the plant, as shown in Figure 4.22.
