In August 1941 Churchill and Roosevelt met in a secluded bay off the coast of Newfoundland. It was the first of their wartime meetings and in many respects the most significant. The Atlantic Charter, its result, proclaimed the two leaders' vision of a new world order, a set of principles that would govern international relations with the coming of peace. This remarkable collection of essays is the result of an international conference of American, British, and Canadian scholars held at Memorial University of Newfoundland that marked the 50th anniversary of the historic meeting. The essays discuss both the Charter's formulation and its long-term significance, and provide fascinating perspectives on the Second World War and its aftermath.

In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero.

« Nursing Research: Reading, Using, and Creating Evidence, Fourth Edition focuses on the concept that research is essential as evidence for nursing practice. Written in a conversational tone and using a reader-friendly approach, this text teaches students how to translate research into evidence in a practical way. The text enables students to gain a fundamental understanding of all types of research used for evidence through its emphasis on research methods, use of research evidence in clinical decision-making, and ways to engage in evidence-based practice. The Fourth Edition highlights the importance of translating research findings into evidence as the most critical step for improving patient care. This updated edition contrasts six different models for organizational evidence-based practice, including Magnet designation requirements, collaboration between researchers and practitioners for knowledge translation, community and home health evidence-based practice, and the challenges of creating an organizational culture that values evidence-based practice. »--

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Thinking Skills, second edition, is the only endorsed book offering complete coverage of the Cambridge International AS and A Level syllabus.

Five hundred years ago the great walled city of Constantinople fell under the relentless siege of the Ottoman Turks led by Sultan Mehmed II, Mehmed the Conqueror. Kristovoulos, one of the vanquished Greeks, later entered into the service of the Conqueror and began to write a history of the Sultan's life, starting with the year 1451, the beginning of Mehmed's 31-year reign. Death apparently prevented Kritovoulos from completing his account, but the manuscript covering the first seventeen years has been preserved and this exciting chronicle is here translated into English for the first time. Charles T. Riggs, who died in February 1953 at Robert College in modern Istanbul, was a missionary in the Near East. Originally published in 1954. The author of the international bestseller *The Rise and Fall of the Third Reich* offers a personal account of life in Nazi Germany at the start of WWII. By the late 1930s, Adolf Hitler, Führer of the Nazi Party, had consolidated power in Germany and was leading the world into war. A young foreign correspondent was on hand to bear witness. More than two decades prior to the publication of his acclaimed history, *The Rise and Fall of the Third Reich*, William L. Shirer was a journalist stationed in Berlin. During his years in the Nazi capital, he kept a daily personal diary, scrupulously recording everything he heard and saw before being forced to flee the country in 1940. *Berlin Diary* is Shir-

er's first-hand account of the momentous events that shook the world in the mid-twentieth century, from the annexation of Austria and Czechoslovakia to the fall of Poland and France. A remarkable personal memoir of an extraordinary time, it chronicles the author's thoughts and experiences while living in the shadow of the Nazi beast. Shirer recalls the surreal spectacles of the Nuremberg rallies, the terror of the late-night bombing raids, and his encounters with members of the German high command while he was risking his life to report to the world on the atrocities of a genocidal regime. At once powerful, engrossing, and edifying, William L. Shirer's *Berlin Diary* is an essential historical record that illuminates one of the darkest periods in human civilization.

"Informative, explicit, even suspense-ridden....An important source for students of the Nixon presidency." —The New York Times Former President Richard Nixon's bestselling autobiography is an intensely personal examination of his life, public career, and White House years. With startling candor, Nixon reveals his beliefs, doubts, and behind-the-scenes decisions, shedding new light on his landmark diplomatic and domestic initiatives, political campaigns, and historic decision to resign from the presidency. *Memoirs*, spanning Nixon's formative years through his presidency, reveals the personal side of Richard Nixon. Witness his youth, college years, and wartime experiences, events which would shape his outward philosophies and eventually his presidency—and shape our lives. Follow his meteoric rise to national prominence and the great peaks and depths of his presidency. Throughout his career Richard Nixon made extensive notes about his ideas, conversations, activities, meetings. During his presidency, from November 1971 until April 1973 and again in June and July 1974, he kept an almost daily diary of reflections, analyses, and perceptions. These notes and diary dictations, quoted throughout this book, provide a unique insight into the complexities of the modern presidency and the great issues of American policy and politics.

Nursing Research: Reading, Using and Creating Evidence, Third Edition is an essential text for nursing research courses. This new edition features expanded coverage on the appraisal and use of evidence in the profession of Nursing. As in past editions the text will maintain its traditional focus on research while weaving in an emphasis on evidence-based practice. The text will keep its focus on "how to conduct" research rather than "how to apply" it. Nursing Research: Reading, Using and Creating Evidence, Third Edition will also focus on the dissemination of information and research best practices as conferences and other such resources become more available to students and professionals. The text is intended as an undergraduate resource for pre-licensure or for the RN-to-BSN students taking nursing research or evidence-based practice classes.
