cludes detailed maps and illustrations Discursive Psychology is the first collection to systematically and critically appraise the influence and development of its foundational studies, exploring central concepts in social psychology such as attitudes, gender, cognition, memory, prejudice, and ideology. The book explores how discursive psychology has accommodated and responded to assumptions contained in classic studies, discussing what can still be gained from a dialogue with these inquiries, and which epistemological and methodological debates are still running, or are worth reviving. International contributors look back at the original ideas in the classic papers, and consider the impact on and trajectory of subsequent work. Each chapter locates a foundational paper in its academic context, identifying the concerns that motivated the author and the particular perspective that informed their thinking. The contributors go on to identify the main empirical, theoretical or methodological contribution of the paper and its impact on consequent work in discursive psychology, including the contributors' own work. Each chapter concludes with a critical consideration of how discursive psychology can continue to develop. This book is a timely contribution to the advance of discursive psychology by fostering critical perspectives upon its intellectual and empirical agenda. It will appeal to those working in the area of discursive psychology, discourse analysis and social interaction, including researchers, social psychologists and students.

Congressman John Lewis (GA-5) is an American icon, one of the key figures of the civil rights movement. His commitment to justice and nonviolence has taken him from an Alabama sharecropper's farm to the halls of Congress, from a segregated schoolroom to the 1963 March on Washington, and from receiving beatings from state troopers to receiving the Medal of Freedom from the first African-American president. Now, to share his remarkable story with new generations, Lewis presents *March*, a graphic novel trilogy, in collaboration with co-writer Andrew Aydin and New York Times best-selling artist Nate Powell (winner of the Eisner Award and LA Times Book Prize finalist for *Swallow Me Whole*). *March* is a vivid first-hand account of John Lewis' lifelong struggle for civil and human rights, meditating in the modern age on the distance traveled since the days of Jim Crow and segregation. Rooted in Lewis' personal story, it also reflects on the highs and lows of the broader civil rights movement. Book One spans John Lewis' youth in rural Alabama, his life-changing meeting with Martin Luther King, Jr., the birth of the Nashville Student Movement, and their battle to tear down segregation through nonviolent lunch counter sit-ins, building to a stunning climax on the steps of City Hall. Many years ago, John Lewis and other student activists drew inspiration from the 1958 comic book *Martin Luther King and the Montgomery Story*. Now, his own comics bring those days to life for a new audience, testifying to a movement whose echoes will be heard for generations.

First multi-year cumulation covers six years: 1965-70.

Taking this into consideration, this book will help educators, researchers and students to keep up with these changes, and to stay aware of contemporary issues relating to post-secondary education.

Cognition, Communication, and Romantic Relationships focuses on the role of memory, communication, and social cognition in the development of romantic relationships. The authors review developmental models of communication and examine criticisms of these models. They also explore the stages through which relationships escalate and deteriorate, and consider the processes for such activities as meeting new people, dating, sexual intercourse, and terminating relationships. Differences between men and women are discussed throughout the text, in light of current research supporting systematic gender differences in how people think about romance and relationships. As an extended analysis and research review of how thinking about romance influences and is influenced by communicative processes, this text offers a deeper unders-

tanding of the cognitive and communicative factors involved in relationship processes. It is designed for use in courses on interpersonal relationships and intimate relations in social psychology, communication, counseling psychology, clinical psychology, and sociology.

Gottlob Frege (1848-1925) was one of the founders of analytical philosophy and the greatest innovator in logic since Aristotle. He introduced many influential philosophical ideas, such as the distinctions between function and argument, or between sense and reference. However, his thought is not readily accessible to the non-expert. His conception of logic, which was crucial to his grand project, the reduction of arithmetic to logic, is especially difficult to grasp. This book provides a lucid and critical introduction to Frege's logic, as he developed it in his groundbreaking first book *Begriffsschrift* (Conceptual Notation, 1879). It guides the reader directly to the

core of Frege's philosophy, and to some of the most pertinent issues in contemporary philosophy of language, logic, mathematics, and mind. Unlike most other books, this commentary explains Frege's own logical notation, allowing students to study and appreciate those aspects of his work that he valued most but are least understood today.

Bertrand Tavernier (b. 1941) is widely considered to be the leading light in a generation of French filmmakers who launched their careers in the 1970s, in the wake of the New Wave. In just over forty years, he has directed twenty-two feature films in an eclectic range of genres, from intimate family portrait to historical drama and neo-Western. Beginning with his debut feature--*L'Horloger de Saint-Paul* (1974), which won the prestigious Louis Delluc prize--Tavernier has shown himself to be a public intellectual. Like his films, he is deeply engaged with the pressing issues facing France and the world: the consequences of war, colonialism and its continuing aftermath, the price of heroism, and the power of art. A voracious cinephile, he is immensely knowledgeable about world cinema and American film in particular. Tavernier's roots are in Lyon, the birthplace of the cinema. He founded and presides over the Institut Lumière, which hosts retrospectives and an annual film festival in the factory where the Lumière brothers made the first films. In this collection, containing numerous interviews translated from French and available in English for the first time, he discusses the arc of his career following in the lineage of the Lumière brothers, in that his goal, like theirs, is to "show the world to the world." It is no surprise, then, that an interview with Tavernier is a treat. Beginning with discussions of his own films, the interviews in this volume cover a vast range of topics. At the core are his thoughts about the ways cinema can inspire the imagination and contribute to the broadest possible public conversation.
