SBM Offshore was a holding company with major business operations specialized in designing, con-

structuring, and providing offshore oil and gas drilling equipment such as Floating Production Storage and Offloading ("FPSO") vessels, Single Point Mooring ("SPM") buoys, and Catenary Anchor Leg Mooring ("CALM")

Building upon SBM Offshore terminal technology, Imodco has optimized and qualified the CALM buoy design to remain in the water for up to 30 years before dry dock is required, allowing for major cost savings for clients.

CALM Buoy and PLEM SSM | HSM Offshore

Single point mooring (SPM) is a floating buoy/jetty anchored offshore to allow handling of liquid cargo such as petroleum products. It serves as a link between the shore-facilities and the tankers for loading or off-loading liquid and gas cargo. Find out how SPM works in the article inside.
