CAMERON fully welded ball valves satisfy ASME/ANSI 150 through 2500 (PN 20 through PN 420) and API 2000 through 10,000 standards. Made of forged steel to assure uniform fine grain structure and toughness, they may be specified in sizes from 2 in. to 56 in. (50 mm to 1400 mm). The CAMERON T30 Series fully welded ball valve is one of the most trusted valves in the petroleum industry. Its distinctive design imparts increased strength at reduced weight as well as increased resistance both to pipeline pressures and stresses. The valve combines the strength of forged components with a lightweight and compact spherical design that eliminates body flanges, thus reducing overall size and potential leak paths.
