In 1921, an up-and-coming artist named Man Ray convinced his patron, Ferdinand Howald, to pay his fare from New York to Paris and to support him there for a year. He quickly fell in with the Dadaists, and his art changed. He pioneered a new art form, a cameraless photograph he called the

'Rayograph'. Champs délicieux documents that year in Paris by reproducing the correspondence between Man Ray and Howald and by publishing Howald's personal copy of Ray's album (also Champs délicieux) from that year - the first significant body of Ray's work. By placing these images in the context of the letters, Champs délicieux recreates an important turning point in Ray's career and a definitive moment in art history. This collection, exhibited in the fall of 2000 by co-publisher University of Toronto Art Centre, was edited by Steven Manford, who is currently assembling, with Timothy Baum, a catalogue raisonné of the Rayographs.

Roaming Paris streets by night in the early 1930s, Brassai created arresting images of the city's dramatic nocturnal landscape. The back alleys, metro stations, and bistros he photographed are at turns hauntingly empty or peopled by prostitutes, laborers, thugs, and lovers. 'Paris by Night', first published in French in 1932, collected sixty of these images, which have since become photographic icons. This new edition brings one of Brassai's finest works back into print. 'Paris by Night' is a stunning portrait of nighttime in the City of Light, as captured by its most articulate observer.

Two of America's most popular authorities on healthy eating and cooking join forces in this inspiring, easy-to-use cookbook. This is not a diet book. It is a lively guide to healthy cooking, day-by-day, packed with essential information and, above all, filled with enticing food. Andrew Weil, M.D.—author of the best-selling *Eating Well for Optimum Health*—brings to this perfect collaboration a comprehensive philosophy of nutrition grounded in science. Rosie Daley—acclaimed for her best-seller, *In the Kitchen with Rosie*—brings to it her innovative and highly flavorful spa cuisine. The recipes are eclectic, drawing from the healthy and delicious cooking of the Middle East, the Mediterranean, and Asia, among other cuisines. For starters, you

might try Grilled Satay or a Miso Pâté; for soup, often a meal in itself, a hearty Mixed-Bean Minestrone Stew or a Roasted Winter Squash and Apple Soup with Cilantro Walnut Pesto; a special entrée could be the Savory Roasted Cornish Hens with Roasted Garlic or Baked Spicy Tofu with Bean Thread Noodles, Corn, and Mango; for a simple supper, Turkey Burgers or Portobello Burgers; and for the occasional indulgence, a dessert of Almond Fruit Tart or Peach and Blueberry Cobbler. Andy and Rosie do not always agree. When Rosie calls for chicken, Andy offers a tofu alternative; she likes the flavor of coconut milk, whereas he prefers ground nut milk; when she makes a pastry with butter, he suggests using Spectrum Spread. There are no hard-and-fast rules. Lifelong health begins in the kitchen, so this is a lifestyle book as well as a cookbook. In it you will learn from Dr. Weil:

- how to make use of nutritional information in everyday cooking
- what is organic . . . and how to buy organic foods
- the importance of reading labels and what to look for
- sensible advice about eggs, milk, cheese, salt, spicy foods, wine, coffee
- the facts about sugar and artificial sweeteners . . . and from

Rosie: • how to get kids involved—from skinning almonds to layering lasagna • ways to have fun in the kitchen—creating scallion firecrackers and radish rosettes • low-fat and nondairy alternatives for those with special concerns • smart menu planning—letting the seasons be your guide . . . and lots more. This revolutionary book will change forever the way you cook for yourself and your family. With 58 photographs in full color.

The web has its own language, aesthetics, issues, and problems; yet the infrastructure and rules of web site design are still in their infancy. Here, the author discusses how Web designers should collaborate with editors and engineers, have an acute understanding of the concept of real-time, master hypertext, know their audience, be wary of multimedia, and create sites that emphasize simplicity and clarity and that

users can move through quickly. Includes numerous color reproductions of web pages. Annotation copyrighted by Book News, Inc., Portland, OR

Can drinking coffee help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify

causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, *Why* will help you sharpen your causal inference skills.

Amateur hour has arrived, and the audience is running the show In a hard-hitting and provocative polemic, Silicon Valley insider and pundit Andrew Keen exposes the grave consequences of today's new participatory Web 2.0 and reveals how it threatens our values, economy, and ultimately the very innovation and creativity that forms the fabric of American achievement. Our most valued cultural institutions, Keen

warns—our professional newspapers, magazines, music, and movies—are being overtaken by an avalanche of amateur, user-generated free content. Advertising revenue is being siphoned off by free classified ads on sites like Craigslist; television networks are under attack from free user-generated programming on YouTube and the like; file-sharing and digital piracy have devastated the multibillion-dollar music business and threaten to undermine our movie industry. Worse, Keen claims, our “cut-and-paste” online culture—in which intellectual property is freely swapped, downloaded, remashed, and aggregated—threatens over 200 years of copyright protection and intellectual property rights, robbing artists, authors, journalists, musicians, editors, and producers of the fruits of their creative labors. In today's self-broadcasting culture, where amateurism is celebrated and anyone with an opinion, however ill-informed, can publish a blog, post a video on YouTube, or change an entry on Wikipedia, the distinction between trained expert and uninformed amateur becomes dangerously blurred. When anonymous bloggers and videographers, unconstrained by profes-

nal standards or editorial filters, can alter the public debate and manipulate public opinion, truth becomes a commodity to be bought, sold, packaged, and reinvented. The very anonymity that the Web 2.0 offers calls into question the reliability of the information we receive and creates an environment in which sexual predators and identity thieves can roam free. While no Luddite—Keen pioneered several Internet startups himself—he urges us to consider the consequences of blindly supporting a culture that endorses plagiarism and piracy and that fundamentally weakens traditional media and creative institutions. Offering concrete solutions on how we can reign in the free-wheeling, narcissistic atmosphere that pervades the Web, *THE CULT OF THE AMATEUR* is a wake-up call to each and every one of us.
