Federal Financial Report (FFR) | grants.nih.gov

Introduction. Cassava (*Manihot esculenta*) roots are largely cultivated in tropical countries. It has been earmarked as the crop that can spur rural industrial development and raise income for producers, processors, and traders (Echebiri and Edaba 2008). Cassava is the chief source of dietary food energy for the majority of people living in the lowland tropics, and much of the subhumid tropics of ...

Cassava Mosaic Disease and Cassava Brown Streak Disease have compromised this staple crop. The Great Lakes Cassava Initiative was developed to respond to the cassava crisis. This final report summarizes the project's approach, results, and lessons learned.
