Chapter 5 Time Value of Money 5.1 Discuss  
 the role of time value in finance, the  
 use of computational tools, and the basic

patterns of cash flow. 1) Since individuals  
 are always confronted with opportunities  
 to earn positive rates of return on their  
 funds, the timing of cash flows does not  
 have any significant economic conse-  
 quences. F 2) Time value of money is  
 based on the belief that a dollar ...

 the current dollar value of a future amount—  
 the amount of money that would have  
 to be invested today at a given interest  
 rate over a specified period to equal the fu-  
 ture amount.

The NPV function gives you the present val-

ue. You may alternatively want to know  
 how much you will have at the END of the  
 time period (solve for the future value). If  
 this is the case, you start by solving for  
 the NPV. Once you have that, use the 5-  
 key approach to bring that present value  
 forward to the end of the time horizon.

Chapter 5: Time Value of Money Multiple  
 Choice Questions 1. What is the total  
 amount accumulated after three years if  
 someone invests \$1,000 today with a sim-  
 ple annual interest rate of 5 percent?
