About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo-Berger whose expertise with desk top publishing and perseverance was a great help.

The MRCP examination is constantly changing, reflecting the changing pressures on doctors in training. Whilst the MRCP PACES examination has evolved with the times, the core ethos of it, to act as a benchmark for sound clinical examination, logical diagnostic ability, common sense and most importantly, the development of compassionate and ethical physicians has remained unchanged. Whilst this exam has often struck fear into the hearts of junior doctors, we believe it is an assessment of progression during a physician's training that should be relished as an opportunity to demonstrate these ageless qualities that caring practitioners should possess. This book was born out of the philosophy that all doctors sitting their MRCP PACES already have the knowledge and skill to pass the exam, but just require guidance in the correct logical approach that the Royal College is looking for. The book has, therefore, quite unlike other MRCP PACES books, avoided any attempts at being a definitive text. Rather, it has focused on the key aspects that the authors believe are required to pass the examination, in particular focus on presentation style. Whilst medicine is indeed an ocean, the most commonly examined topics have been selected to reflect the likely scenarios a candidate will face — as the old adage goes — 'common things occur commonly'. In producing this book, extensive feedback was sought from candidates revising for the examination to reflect their needs. The layout therefore involves a methodical approach with a short introduction, similar to that presented in the exam, followed by clinical findings expected to be found. An example of presentation style has then been produced to allow the candidate to rehearse and practice this essential component of the exam. Doctors preparing for the exam have limited time due to busy work schedules. Therefore, summary books are key for candidates sitting the MRCP PACES examination. Most PACES candidates fail the exam based on history and communication stations. Therefore, attention has been paid to:

Victoria Sweet's new book, SLOW MEDICINE, is on sale now! For readers of Paul Kalanithi's When Breath Becomes Air, a medical "page-turner" that traces one doctor's "remarkable journey to the essence of medicine" (The San Francisco Chronicle). San Francisco's Laguna Honda Hospital is the last almshouse in the country, a descendant of the Hôtel-Dieu (God's hotel) that cared for the sick in the Middle Ages. Ballet dancers and rock musicians, professors and thieves—"anyone who had fallen, or, often, leapt, onto hard times" and needed extended medical care—ended up here. So did Victoria Sweet, who came for two months and stayed for twenty years. Laguna Honda, relatively low-tech but human-paced, gave Sweet the opportunity to practice a kind of attentive medicine that has almost vanished. Gradually, the place transformed the way she understood her work. Alongside the modern view of the body as a machine to be fixed, her extraordinary patients evoked an older idea, of the body as a garden to be tended. God's Hotel tells their story and the story of the hospital itself, which, as efficiency experts, politicians, and architects descended, determined to turn it into a mod-

ern "health care facility," revealed its own surprising truths about the essence, cost, and value of caring for the body and the soul.

The conciseness [of the answer explanations] is one of the benefits of this book." -- Lisa A. Nowell, MD, Pediatric Resident, PGY-2, Morgan Stanley Children's Hospital of New York Presbyterian, Columbia University There's no better way to prepare for the USMLE Step 2 CK and the pediatrics clerkship exam than LANGE: Q&A: Pediatrics.
