This book analyzes the place and role of sport within public diplomacy, including theoretical conceptualizations of the category of sports diplomacy as a sub-category of public diplomacy and empirical research of selected examples of the use of sport within public diplomacy. The empirical part of the book refers to three approaches to sports diplomacy and concerns the utilization of sport by states in order to shape relations with other states, the role of sport in building the international image of a state and the diplomatic subjectivity of international sports organizations. In reference to the first two approaches, the book uses comparative case study in order to make observations and generalizations concerning sports diplomacy. Apart from that, the book includes a detailed study of the diplomatic subjectivity of the International Olympic Committee.

The gold standard for Congress courses for over 30 years Congress and Its Members, Sixteenth Edition, by Roger H. Davidson, Walter J. Oleszek, Frances E. Lee, and Eric Schickler, offers readers current, comprehensive coverage of Congress and the legislative process by examining the tension between Congress as a lawmaking institution and as a collection of politicians constantly seeking re-election. The Sixteenth Edition of this best-selling text considers the 2016 elections and discusses the agenda of the new Congress, White House-Capitol Hill relations, party and committee leadership changes, judicial appointments, and partisan polarization, as well as covering changes to budgeting, campaign finance, lobbying, public attitudes about Congress, reapportionment, rules, and procedures. Always balancing great scholarship with currency, the best-seller features lively case material along with relevant data, charts, exhibits, maps, and photos.

Criminalized power structures (CPS) are illicit networks that profit

from transactions in black markets and from criminalized state institutions while perpetuating a culture of impunity. The book articulates a typology for assessing the threats of CPS and for implementing appropriate strategies to achieve sustainable peace.

Fully revised and updated, the second edition of Introduction to Global Politics places an increased emphasis on the themes of continuity and change. It continues to explain global politics using an historical approach, firmly linking history with the events of today. By integrating theory and political practice at individual, state, and global levels, students are introduced to key developments in global politics, helping them make sense of major trends that are shaping our world. This is a highly illustrated textbook with informative and interactive boxed material throughout. Chapter opening timelines contextualise the material that follows, and definitions of key terms are provided in a glossary at the end of the book. Every chapter ends with student activities, cultural materials, and annotated suggestions for further reading that now include websites. Key updates for this edition: New chapter on 'The causes of war and the changing nature of violence in global politics' New chapter on 'Technology and global politics' Enhanced coverage of theory including post-positivist theories Uses 'levels of analysis' framework throughout the text New material on the financial crisis, BRIC and Iran Introduction to Global Politics continues to be essential reading for students of political science, global politics and international relations.

Balancing theory with application and featuring an engaging, student-friendly writing style, the TENTH EDITION of COMPARATIVE POLITICS uses a unique theme--Domestic Responses to Global Challenges--to introduce key concepts and examine the growing interdependence of strong and weak states. COMPARATIVE POLITICS takes an in-depth look at fourteen countries, framed within broader discussions in the part-opening chapters on Indus-

trialized Democracies, Current and Former Communist Regimes, and The Global South. The introduction establishes a comparative structure based on five themes: conflict, democratization, economic liberalization, globalization, and challenges, which are then explored for each country. The countries discussed are categorized by economic development, helping students hone their skills of comparison, synthesis, and interpretation by studying countries of similar economic status. For the Sake of Peace examines racism and injustice in the United States through the eyes of those of African descent. Historically America has promoted itself as the moral police promoting democracy across the globe, offering her perspectives and ideas to combat poverty and racial and ethnic violence. The rise of overt political racism and intolerance has made visible, for a global audience for the first time since the Civil Rights Movement, the deeply rooted systems of discrimination and identity-based conflicts in the United States, that gives rise to structural and direct violence. African Americans, like other minorities, find themselves in a unique position in this age as new forms of race lynching continue to go unchecked; voting rights continue to be suppressed; prisons continue to serve as a mechanism for disenfranchising minorities and the poor. This volume centers around an understanding of peace that is concerned with justice and racial equality. Highlighting the prevailing impact of anti-black racism and injustice, authors offer prescriptive and descriptive insight that will aid in understanding and overcoming these historical and contemporary obstacles to peace focusing on specific themes including civil rights, education, white supremacy, structural violence, ritual, reparations, and human rights. Interdisciplinary in perspective, the essays are written by leading and emerging scholars, activists, and practitioners

from the viewpoints of history, conflict analysis and resolution, anthropology, ethics, theology, and philosophy. A foreword by The Rev. Canon Nontombi Naomi Tutu, daughter of Nobel Peace Prize-winner Archbishop Desmond Tutu and Cathedral Missioner for Racial and Economic Equity at The Cathedral of All Souls in Ashville, NC, highlights the importance of Africana perspectives in the global pursuit of peace and equality.

Using a broad range of case studies, this book examines conflict and the international relations facing the world today.

Oren reveals the fervently pro-German views of the founder of the discipline, John W. Burgess, who stated that the Teutonic race was politically superior to all others, and he presents evidence of a long-term, intimate relationship between the discipline and the national security agencies of the U.S. government."--BOOK JACKET.

The new edition of an international bestseller helps individuals and organizations shift to a new mindset that will improve performance, spark collaboration, accelerate innovation, and make your life and the lives of everyone around you better. Without even being aware of it, many of us operate from an inward mindset, a single-minded focus on our own goals and objectives. This book points out the many ways, some quite subtle and deceptive, that this mindset invites tension and conflict. But incredible things happen when people switch to an outward mindset. They intuitively understand what coworkers, colleagues, family, and friends need to be successful and happy. Their organizations thrive, and astonishingly, by focusing on others they become happier and more successful themselves! This new mindset brings about deep and far-reaching changes. The *Outward Mindset* presents compelling true stories to illustrate the gaps that individuals and organizations typically experience between their actual inward mindsets and their needed outward mindsets. And it provides simple yet profound guidance and tools to help bridge this mindset gap. This new edition includes a new preface, updated case studies, and new material covering Arbinger's latest research on mindsets. In the long run, changing negative behavior without changing one's mindset doesn't last—the old behaviors always reassert themselves. But changing the mindset that causes the behavior changes everything.

This is the first book-length attempt to provide a political and historical synthesis of the quarter-century (1958-81) the Gaullists were in power in France while putting the Fifth Republic they cre-

ated into a broader comparative perspective. The author analyzes the reasons for the success of the Gaullists in bringing France its first successful democratic government, showing that Fifth Republic France and similar interventionist states succeeded precisely because the political model on which they based their actions conformed to the needs of the industrialized world from the late 1930s through the early 1970s. He then demonstrates that the difficulties the Gaullists and their Socialist successors have faced may be symptomatic of the kinds of problems the entire advanced industrialized world will encounter as we move into the next century. Divided into five parts, the book begins by examining the enduring problems faced by the Third and Fourth Republics in France. The second section covers the new constitution, de Gaulle's behavior as president, and the rationalization of the party system. In Part Three, the author explores how the Gaullists and their allies used the levers provided them by the constitution and by political reforms to take consistent, systematic, and long-term steps to deal with problems that had confounded their predecessors for generations. Turning to the regime's failures, the author analyzes the persistent problems of centralization and alienation that continued to plague France despite the successes of the Fifth Republic. The final section addresses the broader implications of the Gaullist experience for industrialized states in general. An ideal supplemental text for courses in French politics and history, this book offers important new insights into a critical period in that country's modern political development.

Andrew Rawnsley's bestselling book lifts the lid on the second half of New Labour's spell in office, with riveting inside accounts of all the key events from 9/11 and the Iraq War to the financial crisis and the parliamentary expenses scandal; and entertaining portraits of the main players as Rawnsley takes us through the triumphs and tribulations of New Labour as well as the astonishing feuds and reconciliations between Tony Blair, Gordon Brown and Peter Mandelson. This paperback edition contains two revealing new chapters on the extraordinary events surrounding the 2010 General Election and its aftermath.

The WHO Regional Office for Europe set up a working group of experts to provide scientific advice to the Member States for the development of future legislation and policy action in the area of assessment and control of night noise exposure. The working group reviewed available scientific evidence on the health effects of

night noise, and derived health-based guideline values. In December 2006, the working group and stakeholders from industry, government and nongovernmental organizations reviewed and reached general agreement on the guideline values and key texts for the final document of the "Night noise guidelines for Europe". Considering the scientific evidence on the thresholds of night noise exposure indicated by "Lnight,outside" [L suffix night,outside] as defined in the Environmental Noise Directive (2002/49/EC), an Lnight, outside of 40 dB should be the target of the night noise guideline (NNG) to protect the public, including the most vulnerable groups such as children, the chronically ill and the elderly. "Lnight,outside" value of 55 dB is recommended as an interim target for the countries where the NNG cannot be achieved in the short term for various reasons, and where policy-makers choose to adopt a stepwise approach. These guidelines are applicable to the Member States of the European Region, and may be considered as an extension to, as well as an update of, the previous WHO "Guidelines for community noise" (1999). This text is appropriate for comparative politics, world politics, and global politics courses taught at the university level. The Canadian edition of *Comparative Politics: An Institutional and Cross-National Approach* provides students and instructors with a balance of the theoretical, institutional and polity specific approaches. Emphasis is placed on political institutions because of their ease of comparison, their facility of identification and classification, and the extent to which they lend themselves to analysis. *Comparative Politics* gives students both the tools and the perspective to undertake a meaningful cross-national introduction to the political world in which they must operate.

This book is an introduction to the study of international organizations in the field of International Relations directed toward students in the discipline. It looks at the different ways in which IOs are studied and then applies these different modes of study to a variety of specific case studies.

This book is about conflict resolution and the ways that it can change the world.

Critics may sing from an over familiar hymn sheet of so-called 'cult films', but there remains an epoch of British cinema still awaiting discovery that is every bit as provocative and deserving of attention. This book lays out the Rondine method of peacebuilding training as it has been used for more than 20 years to foster interpersonal, interreligious, and intercultural relations, and explores the reception of this psycho-social peacebuilding methodology by a series of scholars and practitioners.

A wild journey through the shady side of Bluegrass politics, from bribe-takers to traitors to treasury raiders. In 1826, Governor Desha pardoned his own son for murder. In a horrific crime, Governor Goebel was assassinated in 1900. James Wilkinson was branded a traitor against Kentucky and the nation. "Honest Dick Tate" ran away with massive amounts of money from the state treasury. And in modern times, Operation BOPTR0T resulted in perhaps the biggest scandal in the state. At various points in history, Kentucky's politics and government have been rocked by scandal, and each episode defined the era in which it happened. In this book, Robert Schrage and John Schaaf offer a fascinating account of Kentucky's history and its many unique and scandalous characters. Includes photographs

This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the author that discusses how subsequent developments in gender and race studies, as well as global technology and politics, enter into conversation with his original arguments.

Criminalized power structures are the predominant spoilers of peace settlements and stability operations. This volume focuses on the means available to practitioners to cope with the chal-

lenges posed by CPS along with recommendations for improving their efficacy and an enumeration of the conditions essential for their success.

"Reading to Learn in the Content Areas, Seventh Edition, is the book that illustrates how teachers can use reading, discussion, and investigation as ways to learn in any discipline. Numerous examples from a variety of subject areas and grade levels demonstrate how the increased availability of computers, instructional software, Internet resources, and electronic literacy in general, have affected the ways in which children learn and create meaning from their world." --Book Jacket.

From 1928 to 1972, the Alberta Sexual Sterilization Act, Canada's lengthiest eugenic policy, shaped social discourses and medical practice in the province. Sterilization programs—particularly involuntary sterilization programs—were responding both nationally and internationally to social anxieties produced by the perceived connection between mental degeneration and heredity. Psychiatry and the Legacies of Eugenics illustrates how the emerging field of psychiatry and its concerns about inheritable conditions was heavily influenced by eugenic thought and contributed to the longevity of sterilization practices in Western Canada. Using institutional case studies, biographical accounts, and media developments from Western Canada and Europe, contributors trace the impact of eugenics on nursing practices, politics, and social attitudes, while investigating the ways in which eugenics discourses persisted unexpectedly and remained mostly unexamined in psychiatric practice. This volume further extends historical analysis into considerations of contemporary policy and human rights issues through a discussion of disability studies as well as compensation claims for victims of sterilization. In impressive detail, contributors shed new light on the medical and political influences of eugenics on psychiatry at a key moment in the field's development. With contributions by Ashley Barlow, W. Mikkel Dack, Diana Mansell, Guel A. Russell, Celeste Tuong Vy Sharpe, Henderikus J. Stam, Douglas Wahlsten, Paul J. Weindling, Robert A. Wilson, Gre-

gor Wolbring, and Marc Workman.

"A broad selection of case studies, covering the major conflicts the world has faced since 1990, provides readers with material they can use to form their own judgements about the theories." "This text will be valuable for course use both in IR and peace and conflict resolution studies."--Jacket.

In this thought-provoking, passionately written book, Bernard Mayer—an internationally acclaimed leader in the field—dares practitioners to ask the hard questions about alternative dispute resolution. What's wrong with conflict resolution? Why aren't more individuals and organizations using conflict resolution when they have a problem? Why doesn't the public know more about it? What are the limits of conflict resolution? When does conflict resolution work and when does it not? Offering a committed practitioner's critique of the profession of mediation, arbitration, and alternative dispute resolution, *Beyond Neutrality* focuses on the current crisis in the field of conflict resolution and offers a pragmatic response.

The post-1959 Cuban government's engagement with Africa, which was led by its charismatic and revolutionary leader, Fidel Castro, had two connecting dimensions: military internationalism and humanitarian internationalism. While African states and societies benefited immensely from these engagements, it was Fidel Castro's military assistance towards the decolonization of and the pushback of Apartheid South Africa that received the loudest attention and ovation in the developing world. Fidel Castro, this book argues, was never motivated by economic, selfish, or geopolitical considerations; but rather, by the altruism and the certainty of his worldview and by the historical connection between the peoples of Cuba and Africa. The principle of international solidarity, socialism, and the emancipation of Africa was a much-desired aspiration and attainment. Beginning covertly in Algeria in 1961 and the Congo and Guinea-Bissau in 1964; and more conspicuously in Angola in 1975, Fidel Castro and his socialist government was at the forefront supporting liberation movements in their struggle against colonialism. Defining Castro's engagement with Africa was his support for the People's Movement for the Liberation of Angola (MPLA) against the United States-backed Apartheid South Africa, which supported the National Liberation Front of Angola

(FNLA) and the National Union for the Total Independence of Angola (UNITA).

Diaspora & transnationalism are widely used concepts in academic & political discourses. Although originally referring to quite different phenomena, they increasingly overlap today. Such inflation of meanings goes hand in hand with a danger of essentialising collective identities. This book analyses this topic.

From Conflict Resolution to Peacebuilding is designed to introduce students to the key concepts of conflict resolution from a real world perspective. Covering both micro and macro sites of conflict, it offers ways to resolve conflicts at all levels from the interpersonal to the international. Starting with the notion that conflict is a fact of life but peacebuilding is not, this text analyzes protracted conflicts and "wicked problems" and also tackles the harder task of how to resolve conflict and build peace. Hauss' approach to peace and conflict studies is deeply personal and richly informed. Based on a strong research base and decades of experience in the field, the book offers new paradigms for considering the intractable conflicts in our world. Each chapter provides real world examples, stories, and cases that illustrating practical work at both the grass roots and elite levels. In a world where conflict seems to be on the rise at home and abroad, this text provides students with the tools to deal with conflict constructively in their daily lives, as citizens, and as future professionals in the growing field of conflict resolution. Features: Full suite of textboxes for study and application Key terms and references for further reading Conflict labs to help students apply concepts to real world situations "Out on a Limb" boxes ask readers to consider bold new ideas and paradigm shifts for analyzing conflict and building

This book provides an introduction to the role of diversity in complex adaptive systems. A complex system--such as an economy or a tropical ecosystem--consists of interacting adaptive entities that produce dynamic patterns and structures. Diversity plays a different role in a complex system than it does in an equilibrium system, where it often merely produces variation around the mean for performance measures. In complex adaptive systems, diversity makes fundamental contributions to system performance. Scott Page gives a concise primer on how diversity happens, how it is maintained, and how it affects complex systems. He explains how diversity underpins system level robustness, allowing for multiple responses to external shocks and internal adaptations; how it provides the seeds for large events by creating outliers that fuel tipping points; and how it drives novelty and innovation. Page looks at the different kinds of diversity--variations within and across types, and distinct community compositions and interaction structures--and covers the evolution of diversity within complex systems and the factors that determine the amount of maintained diversity within a system. Provides a concise and accessible introduction Shows how diversity underpins robustness and fuels tipping points Covers all types of diversity The essential primer on di-

versity in complex adaptive systems

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

|>The Local Politics of Global English analyzes linguistic globalization in five countries that differ greatly in both their degree of global integration and their use of English. Concepts of hegemony and resistance, elites and subalterns, and liberalization and democratization are incorporated in case studies that provide insight into the politics of linguistic globalization.
