Any given research project is conducted in only one setting and assesses only one or a few dependent variables. And any one study uses only one set of research participants. Social psychology research is sometimes criticized because it frequently uses college students from Western cultures as participants (Henrich, Heine, & Norenzayan, 2010).

Brett W. Pelham and Hart Blanton's Conducting Research in Psychology: Measuring the Weight of Smoke, Fifth Edition supports practical learning, engaging students in hands-on activities as a means of introducing psychological research. The text employs humor and stories to help students understand and connect with concepts.
