AS50K1 - BLANKENSHIP PARSONS

The principle of Access to Knowledge (A2K) has become a common reference point for a diverse set of agendas that all hope to realize technological and human potential by making knowledge more accessible. This book is a history of international copyright focused on principles of A2K and their proponents. Whilst debate and discussion so far has covered the perspectives of major western countries, the author's fresh approach to the topic considers emerging countries and NGOs, who have fought for the principles of A2K that are now fundamental to the system. Written in a clear and accessible style, the book connects copyright history to current problems, issues and events.

Dig deeper into Grails architecture and discover how this application framework works its magic. Written by a core developer on the Grails team, this practical guide takes you behind the curtain to reveal the

inner workings of its 2.0 feature set. You'll learn best practices for building and deploying Grails applications, including performance, security, scaling, tuning, debugging, and monitoring. Understand how Grails integrates with Groovy, Spring, Hibernate, and other JVM technologies, and learn how to create and use plugins to augment your application's functionality. Once you know how Grails adds behavior by convention, you can solve problems more easily and develop applications more intuitively. Write simpler, more powerful code with the Groovy language Manage persistence in Grails, using Hibernate or a NoSQL datastore Learn how Grails uses Spring's functionality and optional modules Discover how Hibernate handles details for storing and retrieving data Integrate technologies for messaging, mail, creating web services, and other JEE technologies Bypass convention and configure Grails manually Learn a general approach to upgrading applications and plugins Use Grails to develop and deploy IaaS and PaaS applications

If you had stood there in the edge of the bleak spruce forest, with the wind moaning dismally through the twisting trees - midnight of deep December - the Transcontinental would have looked like a thing of fire; dull fire, glowing with a smouldering warmth, but of strange ghostliness and out of place. It was a weird shadow, helpless and without motion, and black as the half-Arctic night save for the band of illumination that cut it in twain from the first coach to the last, with a space like an inky hyphen where the baggage car lay. Out of the North came armies of snow-laden clouds that scudded just above the earth, and with these clouds came now and then a shrieking mockery of wind to taunt this stricken creation of man and the creatures it sheltered - men and women who had begun to shiver, and whose tense white faces stared with increasing anxiety into the mysterious darkness of the night that hung like a sable curtain ten feet from the car windows.
