FCR51Z - SANTIAGO EDDIE

BB is selected from thousands of candidates to train for a trip to Mars, but his first mission is to the Moon to give emergency aid.

"Packed with facts you need to read!"--Cover.

Inhabiting a whole kingdom of their own, fungi can be found in every ecosystem. They carpet the forest floor, and hidden fungi decompose matter, feed plants, and affect how animals function. Their beautiful mushrooms come in all colors, shapes, and sizes. Fungal stories include the greening of the Earth, when fungi helped plants first grow on land, and the mass destruction of crops through fungal disease. From the villains of the possible extinction of bananas to plastic-eating eco-warriors, there are more than 1.5 million fungus species, and a huge, unknown number of unnamed "dark" types. They affect other creatures, too, for example by helping break down food, or controlling their minds against their will. Continuing from the gorgeous *Under Your Feet*, and touching on similar topics of conservation and the secret processes within ecosystems, this book of fabulous fungi will intrigue and amaze young readers.

Travel to the Sahara Desert with Josh Smith, real-life archeologist, as he and his crew of intrepid dinosaur hunters face fierce sandstorms, long hours of difficult work, and, finally, the joy of discovering a new species of dinosaur!
