Rights language is a fundamental feature of the modern world. Virtually all significant social and political struggles are waged, and have been waged for over a century now, in terms of rights claims. In some ways, it is precisely the birth of modern rights language that ushers in modernity in terms of moral and political thought, and the struggle for a modern way of life seems for many synonymous with the fight for a universal recognition of equal, individual human rights. Where did modern rights language come from? What kinds of rights discourses is it rooted in? What is the specific nature of modern rights discourse; when and where were medieval and ancient notions of rights transformed into it? Can one in fact find any single such transformation of medieval into modern rights discourse? This book brings together some of the most central scholars in the history of medieval and early-modern rights discourse. Through the different angles taken by its authors, the volume brings to light the multifaceted nature of rights languages in the medieval and early modern world.

George Pullman's lively and accessible introduction to the study of persuasion is an ideal text for use in courses where the understanding and practice of argumentation, rhetoric, and critical thinking are central. Continually challenging his readers to seek and recognize sound evidence, to question the obvious, and to assess and reassess the credibility of claims made by others--including the author's own--Pullman shows the way to strong writing, effective speaking, and rigorous critical thinking.

The main literary dispute of the Renaissance pitted those Neo-Latin writers favoring Cicero alone as the apotheosis of Latin prose against those following an eclectic array of literary models. This Ciceronian controversy pervades the texts and letters collected for the first time in this volume.

Character and the Individual Personality in English Renaissance Drama: Tragedy, History, Tragicomedy studies instantiations of the individualistic character in drama, Shakespearean and non-Shakespearean, and some of the Renaissance ideas allowing for and informing them. Setting aside such fraught questions as the history of Renaissance subjectivity and individualism on the one hand and Shakespearean exceptionalism on the other, we can find that in some plays, by a range of different authors and collaborators, a conception has been evidenced of who a particular person is, and has been used to drive the action. This evidence can take into account a number of internal and external factors that might differentiate a person, and can do so drawing on the intellectual context in a number of ways. Ideas with potential to emphasize the special over the general in envisioning the person might come from training in dialectic (thesis vs hypothesis) or in rhetoric (ethopoeia), from psychological frameworks (casuistry, humor theory, and their interpenetration), or from historiography (exemplarity). But though they depicted what we would call personality only intermittently, and with assumptions different from our own about personhood, dramatists sometimes made a priority of representing the workings of a specific mind: the patterns of thought and feeling that set a person off as that person and define that person singularly rather than categorically. Some individualistic characters can be shown to emerge where we do not expect, such as with Fletcherian personae like Aminator, Arbaces, and Montaigne of The Honest Man's Fortune; some are drawn by playwrights often uninterested in character, such as Chapman's Bussy D'Ambois, Jonson's Cicero, and Ford's Perkin Warbeck; and some appear in being constructed differently from others by the same author, as when Webster's Bosola is set in contrast to Flamineo, and Marlowe's Faustus is set against Barabas. But Shakespearean characters are also examined for the particular manner in which each troubles the categorical and exhibits a personality: Othello, Good Duke Humphrey, and Marc Antony.
