Adventurers, scientists, artists, workers, and visionaries — these are the men and women you will encounter in the short fiction of Kim Stanley Robinson. In settings ranging from the sunken ruins of Venice to the upper reaches of the Himalayas to the terraformed surface of Mars itself, and through themes of environmental sustainability, social justice, personal responsibility, sports, adventure, and fun, Robinson's protagonists explore a world which stands in sharp contrast to many of the traditional locales and mores of science fiction, presenting instead a world in which Utopia rests within our grasp. Kim Stanley Robin-

son has been an ongoing force in the Science Fiction genre for over twenty years, with his novels (Year's of Rice and Salt, Forty Signs of Rain) crossing over to the mainstream, and routinely appearing on the New York Times best sellers list. During the 80s and early nineties, his short fiction continued to push the boundaries of science fiction, defining the science-focused side of the science fiction genre. Award-winning editor Jonathan Strahan worked with Kim Stanley Robinson to select the stories that make up this landmark volume. In addition to these reprints, The Best of Kim Stanley Robinson features a brand-new short story, "The Timpanist of the Berlin Philharmonic, 1942." From Kim Stanley Robinson, award-winning author of the Mars Trilogy, the Three Californias Trilogy, the Science in the Capital series, The Martians, and The Years of Rice and Salt, comes The Best of Kim Stanley Robinson. These twenty-two stories, including the Nebula Award-winning "The Blind Geometer," and World Fantasy Award winner "Black Air" represent The Best of Kim Stanley Robinson.

While Haiti established the second independent nation in the Western Hemisphere and was the first black country to gain independence from European colonizers, its history is not well known in the Anglophone world. The *Haiti Reader* introduces readers to Haiti's dynamic history and culture from the viewpoint of Haitians from all walks of life. Its dozens of selections—most of which appear here in English for the first time—are representative of Haiti's scholarly, literary, religious, visual, musical, and political cultures, and range from poems, novels, and political tracts to essays, legislation, songs, and folk tales. Spanning the centuries between precontact indigenous Haiti and the aftermath of the 2010 earthquake, the *Reader* covers widely known episodes in Haiti's history, such as the U.S. military occupation and the Duvalier dictatorship, as well as overlooked periods such as the decades immediately following Haiti's "second independence" in 1934. We inhabit a vulnerable planet. The devastation caused by natural disasters such as

the southern Asian tsunami, Hurricanes Katrina and Ike, and the earthquakes in China's Sichuan province, Haiti, and Chile—as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population—have made it clear that "business as usual" is no longer sustainable. We need to find ways to improve how we live on this planet while minimizing our impact on it. *Design for a Vulnerable Planet* sounds a call for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience. Drawing on his own and others' experiences across three continents, Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection. He begins by establishing the foundation for a more ecological approach to planning and design, adopting a broad view of ecology as encompassing human and natural, urban and wild environments. Steiner explores precedents for human ecological design provided by architect Paul Cret, landscape architect Ian McHarg, and developer George Mitchell while discussing their planning for

the University of Texas campus, the Lake Austin watershed, and The Woodlands. Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State, including regionalism, urbanism, and landscape in China and Italy. He also examines the lessons to be learned from human and natural disasters such as 9/11, Hurricane Katrina, and the BP oil spill. Finally, Steiner offers a blueprint for designing with nature to help heal the planet's vulnerabilities.

Now featuring new cover artwork, Beth Moore's popular book *To Live Is Christ* looks closely at the passionate and inspiring faith and life of the apostle Paul.
