Study.com has been an NCCRS member since October 2016. The mission of Study.com is to make education accessible to everyone, everywhere. Students can save on their education by taking the Study.com online, self-paced courses and earn widely transferable college credit recommendations for a fraction of the cost of a traditional course. Courses consist of engaging, bite-sized

Chemistry (CHEM) < Sacramento State

Mineralogy is a subject of geology specializing in the scientific study of the chemistry, crystal structure, and physical (including optical) properties of minerals and mineralized artifacts. Specific studies within mineralogy include the processes of mineral origin and formation, classification of minerals, their geographical distribution, as well as their utilization.

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...

Course Number: CHEM 1406 (4 Credit Hours) Offered at CVC, EFC, MVC, NLC, RLC Course Title: Introductory Chemistry I (Allied Health emphasis) This is a Texas Common Course Number. This is a Core Curriculum course selected by the colleges of DCCCD.
