Unhygienic living conditions and little access to effective medical care meant life expectancy was likely limited to about 35 years of age. That's life expectancy at birth, a figure dramatically influenced by infant mortality—pegged at the time as

high as 30%. It does not mean that the average person living in 1200 A.D. died at the age of 35.

Development Through the Lifespan, Seventh Edition is also available via Revel™, an interactive digital learning environment that is a less expensive alternative to the print textbook, enabling students to read, practice, and study in one continuous experience. anywhere, anytime, on any device, giving students the flexibility of toggling between their phone, tablet, and laptop as they move through their day.
