Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are. Thoreau's account of his solitary and self-sufficient home in the New England woods remains an inspiration to the environmental movement - a call to his fellow men to abandon their striving, materialistic existences of 'quiet desperation' for a simple

life within their means, finding spiritual truth through awareness of the sheer beauty of their surroundings.

For a rugged outdoor man and his family, life in northern Minnesota is a wild experience involving wolves, deer, and the sled dogs that make their way of life possible. Includes an account of the author's first Iditarod, a dogsled race across Alaska.

How does language comprise the implicit or explicit curriculum of teaching and learning in multicultural science settings? Building on a growing interest in the ways in which language and literacy practices interact with science teaching and learning to facilitate or obstruct successful student outcomes, this book contributes to scholarship on the role of language in developing classroom scientific communities of practice, expands that work by highlighting the challenges faced specifically by ethnic- and linguistic-"minority" students and their teachers in joining those communities, and showcases exemplary teaching and research initiatives for helping to meet these challenges. End-of-chapter reflection questions and engagement activities facilitate discussion round these issues and provide rich opportunities for the reader to consider the implications of each chapter for science instruction and research and to apply insights developed in a real-world science teaching and learning contexts.

There is a skeleton in the Mattatuck Museum in Connecticut. It has been in the town for over 200 years. In 1996, community members decided to find out what they could about it. Historians discovered that the bones were those of a slave name Fortune, who was owned by a local doctor. After Fortune's death, the doctor rendered the bones. Further research revealed that Fortune had married, had fathered four children, and had been baptized later in life. His bones suggest that after a life of arduous labor, he died in 1798 at about the age of 60. Marilyn Nelson wrote *The Manumission Requiem* to commemorate Fortune's life. Detailed notes and archival photographs enhance the reader's appreciation of the poem.

A flock of birds was moving toward me along the river, hovering over something floating on the water. It drifted down-

stream, closer and closer, until finally it bumped up against the dock. Though it was covered with leaves and branches, now I could tell that it was a raft. I reached down and pushed some of the leaves aside. Beneath them was a drawing of a rabbit. It looked like those ancient cave paintings I'd seen in books--just outlines, but wild and fast and free. Nicky isn't one bit happy about spending the summer with his grandma in the Wisconsin woods, but then the raft appears and changes everything. As Nicky explores, the raft works a subtle magic, opening up the wonders all around him--the animals of river and woods, his grandmother's humor and wisdom, and his own special talent as an artist.
