### SKOWIO - FINLEY GARNER

As a child needs nutrient-rich calories to grow healthily, so God's people experience maturation through consistent, Spirit-empowered feedings from the Bible prepared by a capable, Spirit-filled chef. This is why Paul emphatically charged Timothy, an overseer of a local congregation, to unwaveringly and unrelentingly "preach the word" (2 Tim 4:1-2), a task that assumes not only Scripture's right explanation but also its valid application. Unfortunately, while much scholarly attention has been paid to the former facet, less has been given to the latter. One homiletician, Abraham Kuruvilla (Privilege the Text! A Theological Hermeneutic for Preaching), has recently attempted to fill this void by articulating and demonstrating a methodology through which a preacher can, with confidence and clarity, lead the people of God from the word of God to its intended, and thus binding, application. This work explores the effectiveness of his proposed theology and hermeneutic for the identification, development, communication, and reception of biblically founded, theologically valid, and hearer-relevant application.

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authori-

tarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Set in the future when "firemen" burn books forbidden by the totalitarian "brave new world" regime.

This book contains contributions from the IX International Scientific Conference "Digital Transformation of the Economy: Challenges, Trends and New Opportunities," which was organized by Samara State University of Economics (SSEU, Samara, Russia), 2021, and devoted to the 90th anniversary of this higher education institution. Digital technologies became even more in demand during the pandemic, when companies, state authorities, and educational organizations were forced to switch to a remote format of work. The "forced" digitization of the usual ways of activity required rapid and decisive changes. Understanding the ongoing digital transformation implies the relevance of further in-depth research of this issue in the context of various socioeconomic systems, interdisciplinary interactions, and cooperation between scientists and practitioners. The book is an attempt to analyze these changes and consider them from the point of view of various scientific areas (economics, management, education, law, sociology, and others). This book addresses theoretical and practical aspects by studying the digital technology application in terms of the new socioeconomic reality development: big data in the digital economy, data collection and exchange, artificial intelligence, intelligent communications, digital platforms and strategies for the sustainable development of socioeconomic systems, and new requirements of professional and business education. It provides significant value for scientists, teachers, and students of higher educational institutions.

Provides insight into the practice of blended learning in higher education.
