Note: The current SSID of the Repeater still remains as at previous Eg. "D-Link_DIR-612". "D-Link_DIR-612". You may continue to login in with this SSID with the Pre-Share Key as in Step 5 on your wireless device or follow the guide on changing the Wireless SSID and Password.

How to setup Repeater mode on my router? Vietnam

Answer Wiki. 5 Answers. , Stuck in mesh..!\U0001f60b. No, you can't use, Cause d-link dsl 2750U is an ADSL modem+ router. It is not just a router. And d-link firmware doesn't support to use it just as a router itself. Hence, you can't use. Thank you..

Earlier, I had a BSNL connection, and I so used a D-Link 2730U ADSL modem+router (RJ-11 as input). Now I've switched to GTPL, and so I'm using a TP-Link 740N router (RJ-45 as input). The wireless range of the TP-Link router drops to "poor" just one floor below.
