A Diagnostic Assessment is intended to confirm whether an individual has dyslexia or not. It provides a confirmed diagnosis of dyslexia, as well as a clearer picture of the person's strengths and weaknesses and their individual cognitive profile. The Diagnostic Assessment will be followed by a written report. This report will provide evidence of the individual's dyslexic profile (if the individual has been confirmed as having dyslexia), signposting to other organisations or further ...

Schools and teachers play an essential role in identifying students with reading difficulties, including dyslexia. This article offers a 5-step framework for identifying reading difficulties and determining if a student is eligible for special education services under IDEA — including the role of RTI, cognitive processing tests, and other statewide assessments and curriculum-based measures.

[Patoss Library of Documents & Resources - Patoss Dyslexia](#)  
 The report should clearly describe the referral questions or concerns that led to the assessment. For individual clinical assessment of SLD and dyslexia, a battery of tests is used to ensure reliability and validity. Standard scores and percentile ranks should be included in the report.
