Essential oils are the potent, aromatic compounds derived from plants and contain the medicinal or therapeutic characteristics of that plant. They can be derived from the leaves, flowers, bark, roots, etc. The oils can be derived by water distillation, steam, mechanical processing, or by dry distillation.

Unlike human blood, essential oils only come from specific parts of plants. Some, like cardamon, can be found in seed pods, while others, like ginger, come from the root. Tree resin (myrrh), fruit peels (citrus oils), petals (rose), tree bark (cinnamon), and leaves (eucalyptus) also contains essential oils for some species.

Here are some of the most common essential oils everyone should have stored in their personal medicine cabinet: Lavender - to heal burns, cuts, rashes, stings, reduce anxiety and help sleep after trauma. Peppermint - to improve pain in joints, muscles, relieve digestive issues, reduce fevers, clear ...

In The Beginner's Guide to Essential Oils, you'll find: 30 essential oil profiles -Find practical applications, blending and substitution suggestions, and more for 30 common essential oils. 10 complementary oils -Learn the properties and best uses of 10 popular "carrier" oils you can use to dilute

your essential oils.
