Human Form, Human Function is the first essentials level text that seamlessly weaves together form (anatomy) with function (physiology), an approach that caters to how instructors teach and students learn. Authors Tom McConnell and Kerry Hull incorporate real-life case studies as the vehicle for learning how form and function are linked. Through careful organization, thoughtful presentation, and a conversational narrative, the authors have maintained a sharp focus on communication: between body organs and body systems, between artwork and student learning, between content and student comprehension. Each feature reinforces critical thinking and connects anatomy and physiology to the world of health care practice. This original text offers an exceptional student learning experience: an accessible and casual narrative style, dynamic artwork, and a complete suite of ancillaries help build a solid foundation and spark students' enthusiasm for learning the human body.

This full-color manual is designed for students with minimal backgrounds in science who are pursuing careers in allied health fields. Designed to support the thirteenth edition of Hole's Essentials of Human A&P by Shier, Butler, and Lewis, this manual contains 49 laboratory exercises and reports, which are integrated closely to the textbook. Exercises are planned to illustrate and review the anatomical and physiological facts and principles presented in the text and to help students investigate some of these ideas in greater detail.

Each lab includes learning objectives and cogent summaries of key concepts.

Designed for the one-semester anatomy and physiology course, Hole's Essentials of Human Anatomy and Physiology assumes no prior science knowledge and supports core topics with clinical appli-

cations, making difficult concepts relevant to students pursuing careers in the allied health field. The unparalleled teaching system is highly effective in providing students with a solid understanding of the important concepts in anatomy and physiology.

This laboratory manual was prepared to supplement the textbook Hole's Essentials of Human Anatomy and Physiology, Fourteenth Edition, by Dr. Charles Welsh. As in the textbook, the laboratory manual is designed for students with minimal backgrounds in the physical and biological sciences pursuing careers in professional health fields.

For 1-semester courses in A&P lab. A brief, student-friendly lab manual Essentials of Human Anatomy and Physiology Laboratory Manual is designed for students in health-related programs and the fast-paced, 1-semester A&P course. The 27 full-color, hands-on laboratory exercises include the Histology Atlas and easy-to-follow activities, checklists of materials, Pre-Lab Quizzes, learning objectives and review sheets. The lab manual is written to compliment Essentials of Human Anatomy & Physiology and can be used with any 1-semester text. The 8th Edition uses an intuitive design, clarifies lecture concepts, covers terminology and review questions, and streamlines content in tables.

Designed for the one-semester anatomy and physiology course, Hole's Essentials of Human Anatomy and Physiology assumes no prior science knowledge and supports core topics with clinical applications, making difficult concepts relevant to students pursuing careers in the allied health field. The learn, practice, and access system is used throughout the textbook and digital. "Learning" Outcomes at the beginning of each chapter set the stage for what students will learn, "Practice" questions at the end of each major section help check their recall on what they just read, and "Assess" end of chapter resources help students confirm their accurate recall of what they just learned and practiced. The learn, practice, and assess system is highly effective in providing students with a solid understanding of the important concepts in anatomy and physiology.
