"Essentials of Investments, Twelfth Edition, is intended as a textbook on investment analysis most applicable for a student's first course in investments. The chapters are written in a modular format to give instructors the flexibility to either omit certain chapters or rearrange their order. The highlights in the margins describe updates and important features in this edition"--

Fixed income practitioners need to understand the conceptual frameworks of their field; to master its quantitative tool-kit; and to be well-versed in its cash-flow and pricing conventions. Fixed Income Securities, Third Edition by Bruce Tuckman and Angel Serrat is designed to balance these three objectives. The book presents theory without unnecessary abstraction; quantitative techniques with a minimum of mathematics; and conventions at a useful level of detail. The book begins with an overview of global fixed income markets and continues with the fundamentals, namely, arbitrage pricing, interest rates, risk metrics, and term structure models to price contingent claims. Subsequent chapters cover individual markets and securities: repo, rate and bond forwards and futures, interest rate and basis swaps, credit markets, fixed income options, and mortgage-backed securities. Fixed Income Securities, Third Edition is full of examples, applications, and case studies. Practically every quantitative concept is illustrated through real market data. This practice-oriented approach makes the book particularly useful for the working professional. This third edition is a considerable revision and expansion of the second. Most examples have been updated. The chapters on fixed income options and mortgage-backed securities have been considerably expanded to include a broader range of securities and valuation methodologies. Also, three new chapters have been added: the global overview of fixed income markets; a chapter on corpo-

rate bonds and credit default swaps; and a chapter on discounting with bases, which is the foundation for the relatively recent practice of discounting swap cash flows with curves based on money market rates. [FOR THE UNIVERSITY EDITION] This university edition includes problems which students can use to test and enhance their understanding of the text.

This text provides balanced coverage of the basic concepts of thermodynamics and heat transfer. Together with the illustrations, student-friendly writing style, and accessible math, this is an ideal text for an introductory thermal science course for non-mechanical engineering majors.

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

The market leading undergraduate investments textbook, Essentials of Investments, 8e by Bodie, Kane and Marcus, emphasizes asset allocation while presenting the practical applications of investment theory. The authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace. The eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds.

How the greatest thinkers in finance changed the field and how their wisdom can help investors today Is there an ideal portfolio of investment assets, one that perfectly balances risk and reward? In Pursuit of the Perfect Portfolio examines this question by profiling and interviewing ten of the most prominent figures in the finance world—Jack Bogle, Charley Ellis, Gene Fama, Marty Leibowitz, Harry Markowitz, Bob Merton, Myron Scholes, Bill Sharpe, Bob Shiller, and Jeremy Siegel. We learn about the personal and intellectual journeys of these luminaries—which include six Nobel Laureates and a trailblazer in mutual funds—and their most innovative contributions. In the process, we come to understand how the science of modern

investing came to be. Each of these finance greats discusses their idea of a perfect portfolio, offering invaluable insights to today's investors. Inspiring such monikers as the Bond Guru, Wall Street's Wisest Man, and the Wizard of Wharton, these pioneers of investment management provide candid perspectives, both expected and surprising, on a vast array of investment topics—effective diversification, passive versus active investment, security selection and market timing, foreign versus domestic investments, derivative securities, nontraditional assets, irrational investing, and so much more. While the perfect portfolio is ultimately a moving target based on individual age and stage in life, market conditions, and short- and long-term goals, the fundamental principles for success remain constant. Aimed at novice and professional investors alike, In Pursuit of the Perfect Portfolio is a compendium of financial wisdom that no market enthusiast will want to be without.

Suitable for the graduate/MBA investments market, this work has as its unifying theme that security markets are nearly efficient, meaning that most securities are usually priced appropriately given their risk and return attributes. It focuses on asset allocation, and offers a treatment of futures, options, and other derivative security markets.

Investing for a Lifetime is designed to make saving and investing understandable to the investor. Wharton Professor Richard C. Marston, 2014 recipient of the Investment Management Consultants Association's prestigious Matthew R. McArthur Award, guides an investor through the main investment decisions throughout a lifetime. Investing for a Lifetime shows: how younger investors can set savings goals how both younger and older investors can choose investment portfolios to achieve these goals how investors can sustain spending once reaching retirement. Younger and older investors alike should understand savings goals that will provide enough income to sustain spending in retirement. They should devise rates of saving that allow them to reach their goals by the time of retirement. Though retirement is often the main goal of investing, it's not the only one. Marston discusses how funding a child's education or saving for a down payment for a home affects overall saving. Sensible investing is also necessary for savings goals to be realized. Investing need not be complicated, but Marston explains that a diversified portfolio should include a mix of different types of U.S. stocks, foreign stocks, real estate as well as bonds. He describes each of these

asset classes and shows how they fit in an investor's portfolio. He shows how investors can monitor the performance of their portfolios by establishing benchmarks for each asset class to judge how well their investments are doing. He focuses particular attention on those investors nearing retirement. In today's low interest rate environment, he discusses whether it is possible to fund retirement from interest and dividends alone. He shows how savings combined with Social Security can fund retirement spending. And he asks how the "New Normal" of lower returns might force investors to save more than in past decades, and to spend less in retirement than in the past. Investing for a Lifetime is for investors who want to understand more about the savings and investment process, particularly those who worry about whether their retirement savings will last a lifetime. For undergraduate courses in Investments. The core concepts and tools readers need to make informed investment decisions. Fundamentals of Investing helps individuals make informed investment decisions by providing a solid foundation of core concepts and tools. Smart, Gitman, and Joehnk use practical, hands-on applications to introduce the topics and techniques used by both personal investors and money managers. The authors integrate a consistent framework based on learning goals to keep readers focused in each chapter. Readers leave with the necessary information for developing, implementing, and monitoring a successful investment program. The 13th Edition uses a conversational tone to make the foreign language, concepts, and strategies of investing accessible to readers. With the help of examples throughout, readers learn to make informed decisions in order to achieve investment goals. The book focuses on both individual securities and portfolios, teaching readers to consider the risk and return of different types of investments and how to use this knowledge to develop, implement, and monitor goals. Also available with MyLab Finance MyLab(TM) Finance is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Fundamentals of Investments is aimed at the introductory investments class with students who have relatively little familiarity with investments. The text is written in a relaxed, informal style that engages the student and treats him or her as an active participant rather than a passive information absorber. Fundamentals appeals to intuition and basic principles whenever possible because the authors found that this approach effectively promotes understanding. The text also makes extensive use of examples, drawing on material from the world around us and using familiar companies wherever appropriate. Throughout, the text strikes a balance by introducing and covering the essentials while leaving some of the details to follow-up courses. Topics are organized in a way that would make them easy to apply—whether to a portfolio simulation or to real life—and support these topics with hands-on activities. This ninth edition provides a terrific framework and introduction for students looking to pursue a career in investments—particularly for those interested in eventually holding the CFA charter.

An examination of investment analysis focusing on the theme of asset allocation, securities and security analysis and de-emphasizing technical aspects and mathematical detail. This edition has been updated with a new chapter on mutual funds and sections at the beginning of each chapter relate investments concepts to the real world using current and historical events. International topics and examples are integrated into the sections on market structure and mutual funds, and there is a separate chapter on international topics in finance.

"The second edition of *Modern Corporate Finance: Theory and Practice* combines a forward-looking vision of corporate finance with the tried and true practices of the past. This text emphasizes the modernist movement in finance, which is based on systematic methodology with an emphasis on deductive reasoning and empirical validation. The modernist movement produces a market-value-based approach to finance that emphasizes shareholder wealth maximization, options, and agency relationships. This movement has expanded without question, the frontiers of knowledge in finance. Until *Modern Corporate Finance: Theory and Practice*, instructors

have lacked a framework from which to teach these concepts at the introductory level."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Essentials of Human Behavior combines Elizabeth D. Hutchison's two best-selling *Dimensions of Human Behavior* volumes into a single streamlined volume for understanding human behavior. The text presents a multidimensional framework integrating person, environment, and time to show students the dynamic, changing nature of person-in-environment. In this Third Edition, Hutchison is joined by new co-author Leanne Wood Charlesworth, who uses her practice and teaching experience to help organize the book's cutting-edge research and bring it into the classroom. The text will thoroughly support students' understanding of human behavior theories and research and their applications to social work engagement, assessment, intervention, and evaluation across all levels of practice. This title is accompanied by a complete teaching and learning package.

Completely revised and updated to include the ongoing financial crisis and the Obama administration's programs to combat it, this is the best available introductory textbook for an undergraduate course on Financial Markets and Institutions. It provides balanced coverage of theories, poli-

cies, and institutions in a conversational style that avoids complex models and mathematics, making it a student-friendly text with many unique teaching features. Financial crises, global competition, deregulation, technological innovation, and growing government oversight have significantly changed financial markets and institutions. The new edition of this text is designed to capture the ongoing changes, and to present an analytical framework that enables students to understand and anticipate changes in the financial system and accompanying changes in markets and institutions. The text includes Learning Objectives and end-of-chapter Key Words and Questions, and an online Instructor's Manual is available to adopters. The market leading undergraduate investments textbook, "Essentials of Investments, 8/e" by Bodie, Kane and Marcus, emphasizes asset allocation while presenting the practical applications of investment theory. The authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace. The eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds. Introducing... *Essentials of Investments, 9th Global Edition*, by Zvi Bodie, Alex Kane and Alan J. Marcus. We are pleased to present this Global Edition, which has been developed specifically to meet the needs of international investment students. A market leader in the field, this text emphasizes asset allocation while presenting the practical applications of investment theory without unnecessary mathematical detail. The ninth edition includes new coverage on the roots and fallout from the recent financial crisis and provides increased content on the changes in market structure and trading technology. Enhancements to this new Global Edition include: - New 'On the market front' boxes highlight important investment concepts in real world situations across the globe, to promote student thinking without taking a full case study approach. Dutch Airlines (The Netherlands). - Revised end-of chapter material includes brand new global questions and global internet exercises that feature currencies, companies and scenarios from Europe, Middle East, Africa and Asia to increase engagement for international students. - Global Edition of Connect Plus Finance, McGraw-Hill's web-based assignment and assessment platform with eBook access, helps students learn faster, study more efficiently, and retain more knowledge. This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition.

Fundamentals of Investments was written to:

1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context.
2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world.
3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.

This manual provides detailed solutions to the end-of-chapter problem sets.
