A provocative exploration of the tension between our evolutionary history and our modern woes—and what we can do about it. We are living through the most prosperous age in all of human history, yet we are listless, divided, and miserable. Wealth and comfort are unparalleled, but our political landscape is unmoored, and rates of suicide, loneliness, and chronic illness continue to skyrocket. How do we explain the gap between these truths? And how should we respond? For evolutionary biologists Heather Heying and Bret Weinstein, the cause of our troubles is clear: the accelerating rate of change in the modern world has outstripped the capacity of our brains and bodies to adapt. We evolved to live in clans, but today many people don't even know their neighbors' names. In our haste to discard outdated gender roles, we increasingly deny the flesh-and-blood realities of sex—and its ancient roots. The cognitive dissonance spawned by trying to live in a society we are not built for is killing us. In this book, Heying and Weinstein draw on decades of their work teaching in college classrooms and exploring Earth's most biodiverse ecosystems to confront today's pressing social ills—from widespread sleep deprivation and dangerous diets to damaging parenting styles and backward education practices. Asking the questions many modern people are afraid to ask, *A Hunter-Gatherer's Guide to the 21st Century* outlines a science-based worldview that will empower you to live a better, wiser life.

Designed first and foremost to be practical, bridges nevertheless are often breathtaking in their construction, combining function and aesthetics. The historic structures that span the Evergreen State's highways are no exception. These technological wonders are extraordinary by any measure, yet their stories have remained largely unknown. Conceived by visionary engineers and built by anonymous workmen, Washington's highway bridges are amazing triumphs of skill, and played a significant role in the state's history. Several, at the time of their completion, attracted worldwide attention and the praise of professional engineers, influencing the course of bridge construction. In their quest to compile the first comprehensive history of the state's highway bridges, the authors poured through the extensive records at the Washington State Department of Transportation (WSDOT), collecting definitive documentation and photographs from across the state. This magnificent book, including more than 100 illustrations, represents the culmination of years of study by many individuals associated with WSDOT and the Office of Archaeology and Historic Preservation (Olympia).

*Public Responses to Fossil Fuel Export* provides wide-ranging theoretical and methodological international contributions on the human dimensions of fossil fuel export, with a distinctive focus on exporting countries, some of which are new entrants into the marketplace. What do members of the public think about exporting fossil fuels in places where it is happening? What do they see as its main risks and benefits? What connections are being made to climate change and the impending energy transition? How have

affected communities responded to proposals related to fossil fuel export, broadly defined to include transport by rail, pipeline, and ship? Contributions to the work are presented in three parts. The first part synthesizes the background of the project, outlines major social science theories and relevant previous research, and identifies global trends in energy production. Regional and national case studies related to public opinion on fossil fuel export are included in part two of the manuscript. Part three highlights community-based case studies. Implications for research and practice feature in the concluding chapter. Serves as a definitive reference on the social dimensions of fossil fuel export, bringing together case examples and public opinion research from around the world on this important but understudied issue Explores the broader implications for growing field of energy social science, particularly those focused on public perceptions of energy development, siting controversies and community impacts from energy development Provides practical and policy implications, including the need for better community inclusion in export and transport facility siting decisions, the changing status of certain fuels, impacts on public awareness, and the relevance of the movement of energy resources

This book is one of the first critical analyses of the automobile industry in India. It studies the sector in general and the passenger car industry in particular, and provides valuable insights into the operation of Foreign Direct Investment (FDI) companies in a technology-intensive industry under changing economic regimes. The volume underlines the influence of the changing nature of foreign investment, the impact of economic reforms, technology regimes

and industrial policy on growth, structural changes and development. It offers a detailed account of the trade performance of manufacturers in India's passenger car industry. It also looks at successful cases to draw policy lessons towards encouraging quality FDI and developing India as a base for world production. A useful addition to industry studies in India, this book with its wide coverage and contemporary analyses will interest scholars and researchers of economics, Indian economy and industrial policy, industrial economics, automobile industry and manufacturing sector, development economics and international economics. It will also appeal to policymakers, practitioners and industrial associations.

The purpose of this book is to offer higher education leaders, scholars, consultants, and observers a full range of strategy tools that can be applied to the higher education industry. This is accomplished by a) introducing new concepts and tools to give a

comprehensive view of strategy making in higher education, beyond strategic planning, b) demonstrating the value of the concepts and tools through description and application for different types of institutions (universities, community colleges, for-profit colleges, etc.) and at different levels within institutions (institutional, college, department, etc.), and c) providing guidance on the appropriate uses of the various tools. The last point is especially important, as applying business-like principles to higher education often receives heavy criticism. The book helps readers decipher the appropriate uses of different strategy tools to the higher education industry, but the book also points out dangers and weaknesses. All of this is done within today's context of political, economic, demographic, and global realities.

Outdoor mobility in old age is a complex phenomenon. On the one hand, it is a basic human need and means the physical ability to move. On the other, it means the realization of all types of trips out-of-doors, either by foot or by means of transportation. In addition, societal and individual necessities, modern values and economic interests mutually reinforcing each other have resulted in mobility as an ever more important precondition of ensuring the ability to lead an autonomous life and participate actively in society according to one's individual needs. Mobility also promotes healthy ageing, delays the onset of disabilities, and postpones frailty, thereby contributing to subjective well-being and life satisfaction. With advancing age, however, maintaining mobility may become jeopardized because of the increasing risk of physical and sensory impairments. This book includes information on older people's actual out-of-home mobility, on the transportation tools used, the prevalence of typical problems associated

with out-of-home mobility, the impact of health, social networks, the home and neighbourhood environments, and psychological aspects on their mobility and activities, differences between urban and non-urban areas, and age and gender differences. In addition, a new model of mobility is suggested and the relation between mobility and quality of life is analysed. The book concludes with implications for social and transport policies, urban planning, and industrial pursuits for meeting the mobility needs of ageing adults.

Now in striking full color, *Presenting Data Effectively, Second Edition* by Stephanie D. H. Evergreen shows readers how to make the research results presented in reports, slideshows, dashboards, posters, and data visualizations more interesting, engaging, and impactful. The book guides students, researchers, evaluators, and non-profit workers—anyone reporting data to an outside audience—through design choices in four primary areas: graphics, text, color, and arrangement. The Second Edition features an improved layout with larger screenshots, a review of the recent literature on data visualization, and input from a panel of graphic design experts.

Nicholas Hunt is the man I hate. For good reason. His opinion of me is tainted by prejudice even before my arrival at his grandmother's estate, and my first impression of him is just as abysmal. His arrogance and icy demeanor make it clear that he's the type of man who's best handled at a distance. Fortunately, space shouldn't be an issue inside this Gilded Age mansion and its lush gardens. If I stick with the servants and he keeps to his sailboat and vintage Porsche, we should hardly cross paths at all. Unfortu-

nately, at Rosethorn, I find that all roads eventually lead to Nicholas Hunt. Sparks fly as we spar at the dinner table. Fighting words are flung in the shadows of the palatial halls. We hang suspended in our hatred of one another, painfully oblivious to the heat and tension that build with every moment we're left alone. We're liable to kill one another, I think...right up until my eyes land on his lips and a new feeling grips hold of me: lust. What's worse? He knows it. They say you should keep your enemies close, but when Nicholas tightens his grip on my waist and draws me near, I'm not sure if it's out of loathing or love. One thing's for sure-I intend to find out.

#### A Text book on Economics

This volume is a state-of-the-art compilation of diverse and innovative perspectives, principles, and a number of practiced approaches of fields, courses, and methods of pluralist economics teaching. It fosters constructive controversy aiming to incite authors and commentators to engage in fruitful debate. The complex economic problems of the 21st century require a pluralist, real-world oriented, and innovative discipline of economics, capable of addressing and teaching those complex issues to students from diverse perspectives. This volume addresses a number of key questions: Which models could be taught outside the equilibrium and optimality paradigm? Which methods could help to improve our understanding of the complex globalized economy? How can qualitative and quantitative methods be combined in a fruitful way to analyze complex economic problems? How can the academic isolation of mainstream economics that has developed over many decades be overcome, despite its attempted transdisciplinary imperialism? What role should knowledge from other dis-

ciplines play in teaching economics, and what is the relevance of transdisciplinarity? Through examining these issues, the editors and authors have created a pluralist but cohesive book on teaching economics in the contemporary classroom, drawing from ideas and examples from around the world. Principles and Pluralist Approaches in Teaching Economics is a unique collection of diverse perspectives on the methodology and applications of pluralist economics teaching. It will be a great resource for those teaching economics at various levels as well as researchers and intermediate and advanced students searching for pluralism in economics.

Coontz traces the complexity and variety of family arrangements in American history, from Native American kin groups to the emergence of the dominant middle-class family ideal in the 1890s.

Winner, 2019 William J. Goode Book Award, given by the Family Section of the American Sociological Association Finalist, 2019 C. Wright Mills Award, given by the Society for the Study of Social Problems Riveting stories of how affluent, white children learn about race American kids are living in a world of ongoing public debates about race, daily displays of racial injustice, and for some, an increased awareness surrounding diversity and inclusion. In this heated context, sociologist Margaret A. Hagerman zeroes in on affluent, white kids to observe how they make sense of privilege, unequal educational opportunities, and police violence. In fascinating detail, Hagerman considers the role that they and their families play in the reproduction of racism and racial inequality in America. White Kids, based on two years of research involving in-depth interviews with white kids and their families, is a

clear-eyed and sometimes shocking account of how white kids learn about race. In doing so, this book explores questions such as, "How do white kids learn about race when they grow up in families that do not talk openly about race or acknowledge its impact?" and "What about children growing up in families with parents who consider themselves to be 'anti-racist'?" Featuring the actual voices of young, affluent white kids and what they think about race, racism, inequality, and privilege, White Kids illuminates how white racial socialization is much more dynamic, complex, and varied than previously recognized. It is a process that stretches beyond white parents' explicit conversations with their white children and includes not only the choices parents make about neighborhoods, schools, peer groups, extracurricular activities, and media, but also the choices made by the kids themselves. By interviewing kids who are growing up in different racial contexts—from racially segregated to meaningfully integrated and from politically progressive to conservative—this important book documents key differences in the outcomes of white racial socialization across families. And by observing families in their everyday lives, this book explores the extent to which white families, even those with anti-racist intentions, reproduce and reinforce the forms of inequality they say they reject.

An interrogation of the uses of gender as a tool for cultural and historical analysis. The revised edition reassesses the book's fundamental topic: the category of gender. In arguing that gender no longer serves to destabilize our understanding of sexual difference, the new preface and new chapter open a critical dialogue with the original book. More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and po-

litical perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our

divided world.
