"The Australian Harmonized Export Commodity Classification (A-HECC) is designed for use by exporters and agents to classify goods when providing export declarations to Australian Customs Service (Customs); and to assist users in the interpretation of export statistics published by the Australian Bureau of Statistics (ABS)."--Introd.

This international goods nomenclature is being used by more than 200 countries and Customs or Economic Unions across the globe and currently regulates almost 98% of world trade. With the new version of the Harmonized System coming into force on 1 January 2007, this Customs Compendium is the perfect guide for those who have a stake in international business affairs today.

The Globally Harmonized System of Classification and Labelling of Chemicals (GHS) addresses classification and labelling of chemicals by types of hazards. It provides the basis for worldwide harmonization of rules and regulations on chemicals and aims at enhancing the protection of human health and the environment dur-

ing their handling, transport and use by ensuring that the information about their physical, health and environmental hazards is available. The sixth revised edition includes, inter alia, a new hazard class for desensitized explosives and a new hazard category for pyrophoric gases; miscellaneous amendments intended to further clarify the criteria for some hazard classes (explosives, specific target organ toxicity following single exposure, aspiration hazard, and hazardous to the aquatic environment) and to complement the information to be included in section 9 of the Safety Data Sheet; revised and further rationalized precautionary statements; and an example of labelling of a small packaging in Annex 7.

These are reports of the proceedings of the Harmonized System Committee of the Customs Cooperation Council regarding the Harmonized System nomenclature and the Harmonized System explanatory notes.

"To facilitate the location of references in the Harmonized System (HS) Nomenclature or in the Explanatory Notes to any of the prod-

ucts or articles mentioned therein, the Council has published an Index. This Index is an alphabetical list (Column 1) of the articles and products mentioned in the HS and its Explanatory Notes. The references against each article or product listed in Column 1 show: in Column 2, the legal Section, Chapter or Subheading Note or the heading or subheading in which that article or product is cited; in Column 3, the pages of the Explanatory Notes in which the article or product is mentioned. This publication has been completely revised following the amendments made to the HS on 1 January 2007 and it reflects the update of the Explanatory Notes on 1 February 2007. " -- Editor.

Modifications included: amendments proposed by the Customs Co-operation Council (CCC) but not accepted by the contracting parties to the Harmonized System (HS) Convention; snow board boots; still-image video cameras; power supplies for ADP machines; and cordless handset telephones. Also, probable economic effects of proposed modifications. Appendices: explanation of changes; written submissions from the private sector, and more.
