The complete works of one of England's greatest Edwardian writers Saki is perhaps the most graceful spokesman for England's 'Golden Afternoon' - the slow and peaceful years before the First World War. Although, like so many of his generation, he died tragically young, in action on the Western Front, his reputation as a writer continued to grow long after his death. His work is humorous, satiric, supernatural, and macabre, highly individual, full of eccentric wit and unconventional situations. With his great gift as a social satirist of his contemporary upper-class Edwardian world, Saki is one of the few undisputed English masters of the short story and one of the great writers of a bygone era. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Is there life after capitalism? In this creatively argued follow-up to their book *The End of Capitalism (As We Knew It)*, J. K. Gibson-Graham offer already existing alternatives to a global capitalist order and outline strategies for building alternative economies. *A Postcapitalist Politics* reveals a prolific landscape of economic diversity—one that is not exclusively or predominantly capitalist—and examines the challenges and successes of alternative economic interventions. Gibson-Graham bring together political economy, feminist poststructuralism, and economic activism to foreground the ethical decisions, as opposed to structural imperatives, that construct economic “development” pathways. Marshalling empirical evidence from local economic projects and action research in the United States, Australia, and Asia, they produce a distinctive political imaginary with three intersecting moments: a politics of language, of the subject, and of collective action. In the face of an almost universal sense of surrender to capitalist globalization, this book demonstrates that postcapitalist subjects, economies, and communities can be fostered. The authors describe a politics of possibility that can build different economies in place and over space. They urge us to confront the forces that stand in the way of economic experimentation and to explore different ways of moving from theory to action. J. K. Gibson-Graham is the pen name of Katherine Gibson and Julie Graham, feminist economic geographers who work, respectively, at the Australian National University in Canberra and the University of Massachusetts Amherst.

Here are all-new tales about those magical, mysterious dominators of humankind: the cats! Return to the cats' hunting ground with this third collection of stories. Twenty fur-flying fantasies are sure to capture the hearts of cat lovers everywhere.

'Cooperatives stem from interchanges in day-to-day life; and have the capacity to extend their reach to cover economic exchanges across time and space. They offer a complementary form of relationships to the ones economists typically study and favour. A culmination of years of research, this book quite magnificently explains and persuasively advocates a much neglected institution.' Sir Partha Dasgupta, University of Cambridge, UK This eloquent book analyses the theory of the cooperative form of enterprise from an historic perspective, whilst assessing its appeal in the current economic environment. The authors show that cooperatives are enterprises acting in harmony in the market economy, and explore the following questions: How do cooperatives achieve solidarity in keeping together elements normally considered in conflict? Why is the cooperative enterprise not as widespread as the capitalist enterprise? What is its appeal in the present conditions of crisis of the world economy? Alongside other related issues, the volume also discusses the theoretical foundations of the cooperative enterprise and offers an overview of the historical development of the cooperative movement around the world. Special reference is made to the Italian case, which is scarcely known within the international milieu. Broad in scope whilst concise in elucidation, this book will be invaluable to students enrolled in economic, social, historical and political curricula, as

well as leaders of the cooperative movement. People interested in finding a practical alternative to the capitalist form of enterprise will also find this book enriching.

In the social economy area and, more concretely, in the cooperative field, the Basque Country has, no doubt unintentionally, become a worldwide benchmark. The dynamism that energizes Basque social initiatives has resulted in outstanding examples of good practices where firms' priorities are guided by social aims that respond to social needs, steering clear of the commercial profit mechanisms that are the main global driver of private economic initiative. This work, in nine chapters, addresses a wide range of contemporary aspects of the contemporary Basque social economy: the social economy concept; third social sector; legal framework; reality and development in the Autonomous Community of Euskadi; promotion of the Social Economy in Navarre; typology of public policies for the advancement of the Social Economy in Europe; associated work cooperatives in the Northern Basque Country; viability of globalization of cooperatives without risking loss of their hallmark principles and values; and tenant cooperatives. With this book we hope to make a modest contribution to encourage knowledge and reflection on the rich and complex dynamic that informs the Basque social economy today.

This book, first published in 1982, summarises the history and organisation of the group of co-operatives centred in Mondragon. The study makes an in-depth analysis of its economic aspects, including employment creation and manpower planning, the raising of financial resources and planning of investments, problems of earnings differentials, and the incentives that can be derived from worker-ownership. In particular, the authors examine the operation of the self-management system and Mondragon's production efficiently.

"Other field researchers, who usually convey their craft only through one-on-one apprenticeships, should follow Whyte's lead and try to create their own vicarious apprenticeships through candid backstage accounts of their judgment calls in the field. . . . This book gives seasoned investigators an excuse to rethink what they take for granted and to see, step-by-step, how their practice compares with that of another seasoned person. Most people will welcome the chance to do this because of a final characteristic in this book, its even-handed tone." --Journal of Contemporary Ethnography "Useful for a better understanding of the character and promise of ethnographic research." --Journal of Communication "Goes beyond statements of principles to give a realistic picture of problems encountered by the field researcher." --Bulletin de Methodologie Sociologique A highly regarded field researcher tells how he has plied his craft for the past 50 years. William Foote Whyte, in collaboration with his wife, Kathleen, describes the successes--and failures--he has had in studying street corner society in Boston, oil companies in Oklahoma and Venezuela, restaurants in Chicago, worker cooperatives in Spain, factories in New York State, and villages in Peru. With the goal of taking readers into the field with him, Whyte discusses and dissects his chief tools--participant observation and the semistructured interview. He also explains how to evaluate and analyze field data, why the use of local history in social research is valuable, and the ethics of fieldwork. Whyte focuses on four general problems that have plagued his career as a researcher:

The artificial intelligence (AI) landscape has evolved significantly from 1950 when Alan Turing first posed the question of whether machines can think. Today, AI is transforming societies and economies. It promises to generate productivity gains, improve well-being and help address global challenges, such as climate change, resource scarcity and health crises.

In July 2020, the Investment Committee recommended to Council to invite Uruguay to become the 50th adherent to the OECD Declaration on International Investment and Multinational Enterprises. This OECD Investment Policy Review of Uruguay documents the progress made in recent years to align investment policies with the national development strategy in pursuit of the Sustainable Development Goals (SDGs).

The financial crisis is destroying wealth but is also a remarkable opportunity to uncover the ways by which debt can be used to regulate the economic system. This book uses four case studies of co-

operatives to give an in-depth analysis on how they have braved the crisis and continued to generate wealth.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

'User-designer relations' concerns the sorts of working relationships that arise between developers and end users of IT products - the different ways designers of IT products seek to engage with users, and the ways users seek to influence product design. It is through the shifting patterns of these relations that IT products are realised. Although it has generally been accepted that achieving better user-designer relations will improve the quality of IT products, there has been little consensus on how this might be achieved. This book aims to deepen our understanding of the relationships between users and designers both as they emerge in the wild and as a consequence of our attempts to intervene. Through a series of case studies the book juxtaposes in-depth explorations of different perspectives and approaches to thinking about - and doing - user-designer relations, considering important implications for design and computer science more generally.

The journey towards sustainability requires that companies must find innovative ways to make profits and at the same time extend the traditional boundaries of business to include the environmental and social dimensions, a process known as Life Cycle Thinking. This Guide contains many examples illustrating how business organizations are putting Life Cycle Thinking into practice all over the world.

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. The relationship between workers and firms are changing worldwide. Nowhere is this more evident than in the psychological contracts of employment. This book combines the cross-national perspectives of organizational scholars from thirteen countries to examine how societies differ in the nature of psychological contracts in employment and how global business initiatives are bridging these differences. The contributors include social scientists with deep knowledge of the particular societies they describe, and whose personal scholarship involves psychological contract phenomena locally as well as abroad. Readers of Denise Rousseau's award winning book, *Psychological Contract in Organizations* (Sage 1995) will welcome the extension of this ground-breaking work into the global arena.

The first edition of *The Action Research Dissertation: A Guide for Students and Faculty* was a first-of-its-kind reference, distilling the authors' decades of action research experience into a handy guide for graduate students. The Second Edition continues to provide an accessible roadmap that honors the complexity of action research, while providing an overview of how action research is defined, its traditions and history, and the rationale for using it. Authors Kathryn Herr and Gary L. Anderson demonstrate that action research is not only appropriate for a dissertation, but also is a

deeply rewarding experience for both the researcher and participants. This practical book demonstrates how action research dissertations are different from more traditional dissertations and prepares students and their committees for the unique dilemmas they may face, such as validity, positionality, design, write-up, ethics, and dissertation defense.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

A Sot Zen priest and Dharma successor of Kosho Uchiyama Roshi explores eight of Zen's most essential and universal liturgical texts and explains how the chants in these works support meditation and promote a life of freedom and compassion.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

There is a vast literature for and against privatizing public services. Those who are against privatization are often confronted with the objection that they present no alternative. This book takes up that challenge by establishing theoretical models for what does (and does not) constitute an alternative to privatization, and what might make them 'successful', backed up by a comprehensive set of empirical data on public services initiatives in over 40 countries. This is the first such global survey of its kind, providing a rigorous and robust platform for evaluating different alternatives and allowing for comparisons across regions and sectors. The book helps to conceptualize and evaluate what has become an important and widespread movement for better public services in the global South. The contributors explore historical, existing and proposed non-commercialized alternatives for primary health, water/sanitation and electricity. The objectives of the research have been to develop conceptual and methodological frameworks for identifying and analyzing alternatives to privatization, and testing these models against actually existing alternatives on the ground in Asia,

Africa and Latin America. Information of this type is urgently required for practitioners and analysts, both of whom are seeking reliable knowledge on what kind of public models work, how transferable they are from one place to another and what their main strengths and weaknesses are.

Government at a Glance Southeast Asia 2019 is the first edition in the Government at a Glance series for the region. It provides the latest available data on public administrations in the 10 ASEAN member countries: Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam.

Social entrepreneurship and social innovation both seek to improve the world through social change. Whereas social entrepreneurship revolves around the business side of change, social innovation focuses on the processes through which that change is generated. This textbook provides a comprehensive analysis of both topics, covering all the characteristics and elements of social innovation and social entrepreneurship, from a conceptual and practical perspective. The book has four sections: 1) Basics and concepts of Social Innovation and Social Entrepreneurship; 2) Business models and generation of value in social enterprises; 3) Social innovation within traditional companies, and 4) Definition and alignment of the impact of social innovation and entrepreneurship. Students and any practitioners that want to know about social innovation or social entrepreneurship will be exposed to contemporary topics in the field as well as a variety of cases and tools for its development. With its learning objectives, reflective questions, the definition of key concepts, and exercises, this book is the definitive text for advanced undergraduate and graduate courses in social innovation and social entrepreneurship.
