For all courses in construction accounting and construction finance, and for courses in engineering economics taught in construction management programs. This book helps construction professionals and construction management students master the principles of financial management, and adapt and apply them

to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources; how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions, and presents financial equations and accounting transactions more visually to support more intuitive learning.

Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting. Lo/Fisher presents the how and why of reporting accounting information from within an easily-understood theoretical framework. Lo/Fisher has a clean layout that engages the reader with a clear writing style using plain English. This text is built on the current International Financial Reporting Standards (IFRS) and incorporates Accounting Standards for Private Enterprise (ASPE) where appropriate. Our philosophy is that when students understand the current standards, they will be able to analyze and interpret changes in the future. thored by Anne Marie Ward of Ulster University. It communicates the detail necessary to understand, challenge and critically evaluate financial reporting.

Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match prerequisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Solutions manual provides full solutions for all end-of-chapter assignment items, including questions, exercises, problems, and cases.

Based on United States generally accepted accounting principles, this textbook was written by David Annand, EdD, MBA,

CPA, CA, and Professor of Accounting in the Faculty of Business at Athabasca University. It was adapted by Teresa Thompson of Mission College, Santa Clara CA. The material also includes multiple ancillary student resources: a solutions manual for all text questions, a full index, and a student workbook. Students can print outlines for answers to any questions as they need them and fill in responses manually. All of this material is able to be printed on demand in whole or in part. The text and solutions manual are also available as a combined .pdf file for onscreen viewing. The material is fully bookmarked. All questions and problems are hyper-linked to related solutions. In addition there are links to randomly-generated Excel® problems at the end of each chapter. These cover key concepts, and provide unlimited practice and feedback. Instructor resources include an assignment and exam bank, and PowerPoint® slides. All text, solutions manual, and student workbook material is available in .docx format for instructors to customize if desired. The material is freely-adaptable and shareable under a CC-BY-SA-NC licence. A comprehensive, end-of-term case is also available (Jensen Wholesalers Corp.). This requires students to prepare 18 different year-end adjusting entries and all four types of financial statements, and calculation and analysis of 16 different financial statement ratios. Tailored solutions are provided for instructors. An example is included on this webpage. Unique versions can be created for any number of individual students or groups. This case, and the assignment and exam bank are available upon request to davida@athabascau.ca. While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition

of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each

chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

For intermediate and financial accounting courses at the MBA and undergraduate level, or a supplement to financial statement analysis texts. This collection of financial accounting cases is designed to help students become financial statement users. Each case utilizes financial statement information (balance sheet, income statement, statement of cash flow and/or footnotes) and a number of topical questions. Students use the financial statement information to infer and interpret the economic events underlying the numbers. Related articles taken from business publications accompany some cases, and information from the articles is incorporated into the case question material. Also available the Pearson Custom Case Program.

Fundamentals of Financial Accounting, presents an engaging, balanced, and appropriately paced analysis of the fundamentals of financial accounting. Its conversational writing style makes it easy to read and understand, while the selection of real focus companies reinforces the relevance of accounting by introducing students to accounting and business activities in the context of their favorite companies. Balance between preparer and user orientations is achieved throughout the book, by studying both the accounting activities that take place inside the company, as well as evaluating their impact on decisions, and users outside the company. Topic coverage is

paced appropriately for students new to accounting, and is thoroughly reinforced every step of the way with an ample variety of innovative pedagogical tools. Clearly understandable, relevant, and accessible, Fundamentals of Financial Accounting is simply the most student-friendly financial book on the market and provides the tools for students to grasp financial accounting from the ground up.

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning

costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.
