(PDF) The Theory of Multiple Intelligences

The theory of multiple intelligences, developed by psychologist Howard Gardner in the late 1970's and early 1980's, posits

that individuals possess eight or more relatively autonomous intelligences. Individuals draw on these intelligences, individually and corporately, to create

Hailed by educators throughout the world, Howard Gardner's theory of multiple intelligences has been applied in hundreds of classrooms and school districts since Frames of Mind was first published in 1983.

In Frames of Mind Howard Gardner treated the personal intelligences 'as a piece'. Because of their close association in most cultures, they are often linked together. However, he still argues that it makes sense to think of two forms of personal intelligence. Gardner claimed that the seven intelligences rarely operate independently.

Frames Of Mind The Theory

In Frames of Mind, Gardner challenges the widely held notion that intelligence is a single general capacity possessed by every individual to a greater or lesser extent. Amassing a wealth of evidence, Gardner posits the existence of eight different intelligences, each as important as the next, that comprise a unique cognitive profile for each person.
