~~How to Install a Portable Air Conditioner: 10 Steps~~

Split air conditioning systems will need to be professionally installed and require an outdoor unit to expel the heat from the room, whereas an evaporative air cooler will not require any installation but must be used in rooms with good air flow and cannot be used in fully enclosed rooms

due to the moisture they throw out into the air to assist with cooling.

To attach the air conditioner to the wall, simply align the female connections on the back of the unit with the male connections on the mounting plate and press firmly to secure the unit in place. Make sure the unit tilts backward 2-3 degrees so that water can flow out of the drain pipe.
