FY44N4 - MORROW SANIYA

"The book contains the essential information that wildlife biologists and managers use to manage wildlife populations today, and it gives students the information they need to pursue a profession in wildlife management and conservation"--

Globally and Locally tackles the economic difficulties of succeeding in a world that is increasingly global while surviving on the local level. It brings together the ideas of several scholars on the political and economic strategies to follow in the modern global market. The editors examine the United States, Scotland, and Japan on the corporate, community, and regional levels and make recommendations to improve the present economic structures without completely replacing them. Each concept focuses on the unique goal of charting a middle path that binds theory with practice, culture with nature, economy with ecology, and the global with the local. A strategy is devised for global success without neglecting matters such as culture, the environment, small towns, or rural areas.

Chuck Robbins' personal experiences

guide the reader through the myriad public lands. He explains the geology, animal and plant life, and history of Montana's most storied and scenic locales, with a special emphasis on birds found in Montana. Out-of-staters and Montana residents alike will find much of interest in this full-color guide.

Fittingly, the Act's chief sponsors were a Senator from Nevada, Key Pittman, and a Representative from Virginia, A. Willis Robertson. The Pittman-Robertson Act, as it came to be called, sped through Congress and was signed into law by President Franklin Roosevelt on September 2, 1937. From a modest beginning, the Pittman-Robertson program has grown with the economy and the human population of our country. By now it has channeled nearly \$1.7 billion in Federal excise tax receipts, augmented by some \$600 million from the States, into activities to restore wildlife. The projects include State acquisition of acreage needed to bring wildlife back, research into wildlife requirements and problems, active management of habitats, and development of scientific ways to enable wildlife and people to share our land in harmony. The program has strengthened State governments and built

wildlife management into a respected profession.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
