Recording video+audio LAG · Issue #92 · iizukanao/picam ...

The next challenge is to combine the video file and the audio file. I have not tried this with the Raspi, but OpenShot will allow you to import the two files and move the audio backwards and forwards in time until in sync with the video. Don't forget, if you want to view mp4 files on the Raspi, you will need a licence.

I'm going to make a DIY monitoring system by using a Raspberry Pi Camera v2 (8 megapixels). Does the RasPi Camera v2 have a built-in microphone so that I can record the sound together when I take a video?

Recordbuf. recordbuf is a parameter which controls how many past keyframes should be included at the start of a recording. For example, recordbuf=1 means that a recording will start from the last keyframe, and recordbuf=2 means that a recording will start from the second last keyframe relative to when hooks/start_record is created. The minimum value of recordbuf is 1.
