2IXN85 - JORDAN DECKER

Globalization and the Developing Countries: The Inequality ... global economy have reduced the level of extreme poverty in the world and enhance the ability of developing countries to increase their wealth. Instead this anti-globalization movement suggest that globalization has increased inequality for developing countries via Trade Tariffs, forced removal of trade barriers, whilst developed countries

Globalization has increased inequality in developing nations between the rich and the poor. The benefit of globalization is not universal. Globalization is making the rich richer and the poor...

Summary: Developing countries face special risks that globalization and market reforms will exacerbate inequality, at least in the short run, and raise the political costs of inequality. During that transition, more emphasis on minimizing and managing inequality would minimize the real risks of a protectionist and populist backlash.

Globalization is a combination of gross domestic product (GDP), industrialization, and the Human Development Index (HDI). Developed nations benefit under globalization as businesses compete... Globalization is an economic concept that works by easing the movement of goods and people across borders. To ease the process, all investments, trade, and markets get integrated, and barriers get minimized or eliminated, to ensure different nations enjoy the flow of goods and services.
