This work examines how death, suicide and violence shaped modern queer culture, arguing that negative experiences, as much as affirmative subculture formation, influenced the emergence of a collective sense of same-sex identity. Bauer looks for this history of violence in the work and reception of the influential sexologist Magnus Hirschfeld (1868-1935), and through Hirschfeld's work examines the form and collective impact of anti-queer violence in the first half of the twentieth century. Hirschfeld's archive (his library at the Institute for Sexual Sciences in Berlin) was destroyed by the Nazis in 1933, so the archive of Bauer's title is one that she's built from over a hundred published and unpublished books, articles, films and photographs.

Modern project management had its genesis in the field of operations research in the late 1940s, but today it is a much more diverse subject. It has evolved and developed a much wider range of methods, techniques, and skills that the project manager can draw upon. Not all these skills are relevant to every project, but an assortment of them will be relevant to most. This book aims to describe for students, researchers and managers the full range of skills that project managers can use to develop their methodologies. The authors group the skills into nine perspectives, representing nine schools of project management research and theory. By attaching a metaphor to each of these perspectives, students, researchers and managers are better able to understand each approach and decide whether it is best suited to the development of a strategy for managing their project. Perspectives on Projects builds upon the various theoretical orientations that the field of project management has developed. Featuring several case studies, drawn from a variety of settings, to illustrate how the different schools can provide different perspectives on projects, this book is an ideal text for anyone involved in project management.

This anthology is a symposium on queer space and queer utopias. Through the presentation of empirical work by contemporary queer theorists this book aims to create a critical dialogue about the emergence of queer spaces and the ways in which they aim to further queer futurity.

xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is rad-

ically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Pro-

tected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as *War.pl*, *Media and Drugs in Pynchon's Second World War*, again from Kittler, and Simon Ford's elegant take on J.G. Ballard's crashed cars exhibition of 1970, *A Psychopathic Hymn*. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his *Notes on the Concept of the Bio-adapter* which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of *udaff.com* provides both a reexamination of culture and language, and an example of the diversity of *xxxxx*; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. *xxxxx* liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes *xxxxx*. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and *socialfiction.org*. *DIVExamines* questions of agency, artisanship, and identity in relation to collaborative art practice./div

Floral morphology remains the cornerstone for plant identification and studies of plant evolution. This guide gives a global overview of the floral diversity of the angiosperms through the use of detailed floral diagrams. These schematic diagrams replace long descriptions or complicated drawings as a tool for understanding flo-

ral structure and evolution. They show important features of flowers, such as the relative positions of the different organs, their fusion, symmetry, and structural details. The relevance of the diagrams is discussed, and pertinent evolutionary trends are illustrated. The range of plant species represented reflects the most recent classification of flowering plants based mainly on molecular data, which is expected to remain stable in the future. This book is invaluable for researchers and students working on plant structure, development and systematics, as well as being an important resource for plant ecologists, evolutionary botanists and horticulturists.

*Korean: A Comprehensive Grammar* is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of *Korean: A Comprehensive Grammar* makes it an essential reference source on the Korean language.

Alphabetically arranged entries present nearly 70 American women poets who published significant works after 1945.

Includes over 25 maps and 50 photos. More than 60 American divisions participated in the defeat of Germany in 1944-45. This is the story of one of the best of them, a division which fought continually from the Normandy beachhead to the banks of the Elbe River in the heart of Germany. *Work Horse of the Western Front* is as accurate and honest an account as the writer could make it under the circumstances. Waging war is an exacting business undertaken under conditions which make for confusion and "snafu." The writer has taken the facts as he saw them, the bad as well as the good, with the conviction that he would slight the very real achievements of the Division if he attempted to present a saccharine picture of inevitable triumphs. The measure of a great fighting unit is not that it never runs into difficulties but that it minimizes its errors and gains by experience. By these standards, *Old Hickory* was a great division—as is evidenced by the caliber of the tasks it was called upon to perform.

This book constitutes the refereed proceedings of the 6th International Conference on Computational Logistics, ICCL 2015, held in

Delft, The Netherlands, in September 2015. The 50 papers presented in this volume were carefully reviewed and selected for inclusion in the book. They are organized in topical sections entitled: transport over ground, transport over water, international coordination within a system, external coordination among systems. **Monster Roster: Existentialist Art in Postwar Chicago** (on view at the Smart Museum in winter/spring 2016) will be accompanied by a comprehensive publication—the first of its kind—that includes an introductory essay by critic and collector Dennis Adrian; an overview of the Monster Roster by John Corbett; an essay about the historical context out of which the Monster Roster emerged by historian Thomas Dyja; a discussion of Monster Roster prints by art historian and curator Marc Pascale; an in depth look at Leon Golub's early work by art historian Jon Bird; and a personal response to the Monster Roster's work by contemporary artist Arlene Shechet. There will also be historic reprints of key texts including Franz Schulze's 1972 essay "Chicago: The Setting and the Group" from *Fantastic Images: Chicago Art Since 1945* as well as Jean Dubuffet's lecture "Anticultural Positions" given at the Arts Club of Chicago in 1951. The publication will also contain full-color reproductions of all work on view in Monster Roster, a detailed chronology and exhibition history, and reproductions of ephemera and historical photographs.

**Paint by Sticker: Travel** celebrates a time when elegant posters, in an Art Deco style, beckoned visitors to faraway romantic places—from Venice, with its canals and gondolas, to Cairo, gateway to the pyramids—all through the absorbing activity of painting by sticker. **Paint by Sticker** is a compelling new activity for crafters and artists, doodlers and coloring book enthusiasts of all ages. As in paint-by-number, each template is divided into dozens of spaces, each with a number that corresponds to a particular sticker. Find the sticker, peel it, place it. And then the next, and the next, and the next, until your "poster" comes to life. **Paint by Sticker: Travel** includes everything you need to create twelve vibrant, nostalgic travel posters—the stickers, the templates, the intuitive directions. The works include Moscow, home of St. Basil's Cathedral and its candy-colored onion domes. India and the Taj Mahal, crown jewel in a world of fascinating destinations. Bermuda. Monaco. Japan and its cherry blossoms and pagodas. Bon voyage!

Farmer Earl has had enough—his home is too crowded! So, he vis-

its the wise woman in town for help. She tells him to bring all his ducks in the house. And then all his horses. And all his goats too! How will there be more room with all these animals? This updated folktale uses humor to explore what it takes to gain a new perspective.

Drawing on the postmodern perspective and concerns that informed her groundbreaking *Terpischore in Sneakers*, Sally Bane's *Writing Dancing* documents the background and development of avant-garde and popular dance, analyzing individual artists, performances, and entire dance movements. With a sure grasp of shifting cultural dynamics, Banes shows how postmodern dance is integrally connected to other oppositional, often marginalized strands of dance culture, and considers how certain kinds of dance move from the margins to the mainstream. Banes begins by considering the act of dance criticism itself, exploring its modes, methods, and underlying assumptions and examining the work of other critics. She traces the development of contemporary dance from the early work of such influential figures as Merce Cunningham and George Balanchine to such contemporary choreographers as Molissa Fenley, Karole Armitage, and Michael Clark. She analyzes the contributions of the Judson Dance Theatre and the Workers' Dance League, the emergence of Latin postmodern dance in New York, and the impact of black jazz in Russia. In addition, Banes explores such untraditional performance modes as breakdancing and the "drunk dancing" of Fred Astaire. **Ebook Edition Note:** All images have been redacted.

The Government published the UK Cyber Security Strategy in June 2009 (Cm. 7642, ISBN 97801017674223), and established the Office of Cyber Security to provide strategic leadership across Government. This document sets out the Home Office's approach to tackling cyber crime, showing how to tackle such crimes directly through the provision of a law enforcement response, and indirectly through cross-Government working and through the development of relationships with industry, charities and other groups, as well as internationally. The publication is divided into five chapters and looks at the following areas, including: the broader cyber security context; cyber crime: the current position; the Government response and how the Home Office will tackle cyber crime.

Considered by many to be a founder of Afrofuturism, Sun Ra—aka Herman Blount—was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which, dressed in Egypto-space costumes, played everything from boogie-woogie and swing to fusion and free jazz. John Szwed's *Space is the Place* is the definitive biography of this musical polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was mercurial and confounding. Szwed's readers—whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather—will find that, indeed, space is the place.

*Against Ambience* diagnoses - in order to cure - the art world's recent turn toward ambience. Over the course of three short months - June to September, 2013 - the four most prestigious museums in New York indulged the ambience of sound and light: James Turrell at the Guggenheim, *Soundings* at MoMA, Robert Irwin at the Whitney, and Janet Cardiff at the Met. In addition, two notable shows at smaller galleries indicate that this is not simply a major-donor movement. Collectively, these shows constitute a proposal about what we want from art in 2013. It's impossible to play possum. While we're in the soft embrace of light, the NSA and Facebook are still collecting our data, the money in our bank accounts is still being used to fund who-knows-what without our knowledge or consent, the government we elected is still imprisoning and targeting people with whom we have no beef. We deserve an art that is the equal of our information age. Not one that parrots the age's self-assertions or modes of dissemination, but an art that is hyper-aware, vigilant, active, engaged, and informed. We are now one hundred years clear of Duchamp's first readymades. So why should we find ourselves so thoroughly in thrall to ambience? *Against Ambience* argues for an art that acknowledges its own methods and intentions; its own position in the structures of cultural power and persuasion. Rather than the warm glow of light or the soothing wash of sound, *Against Ambience* proposes an art that cracks the surface of our prevailing patterns of encounter, initiating productive disruptions and deconstructions.
