Packers and Completions Equipment Catalog

Large, heavy-duty slips in the hydraulic holddown mechanism help prevent the tool from being pumped up the hole. Drag springs operate the J-slot mechanism on ≤ 3 1/2-in. (88.9-mm) packer bodies, while larger packer sizes ≥ 4-in. (101.6 mm) use drag blocks. Automatic J-slot sleeves are standard equipment on

all Halliburton packer bodies.

Hydraulic/Hydrostatic Packers - ShopBakerHughes.com

Power-Packer's self-contained manual lift hydraulic actuator is a reliable, cost-effective solution for patient handling and lifting devices. This smooth-action, motion control system consists of a hand hydraulic pump, reservoir, cylinder and valve. Added external hoses or fittings help ensure easiest installation and use.

Hydraulic Packer Manual Halliburton

The AHR packer is a retrievable, hydraulic-set production packer set in casing to divert casing-to-tubing flow. It is set by pressuring up the tubing string against a plugging device below the packer. A bi-directional directional barrel slip holds the packer in place against loads and well pressure from above and below.

Hydraulic-Set AHR Retrievable Packer - Halliburton

The Halliburton hydraulic-set Perma-Series® packer is a single-trip permanent millable production version of the proven Perma-Series packer. It is ideal for highly deviated and/or single-trip production and injection applications. This packer includes a one-piece mandrel and sealbore, which eliminates a potential leak path.
