The conferences on 'Applications for Computers and Operations Research in the Minerals Industry' (APCOM) initially focused on the optimization of geostatistics and resource estimation. Several standard methods used in these fields were presented in the early days of APCOM. While geostatistics remains an important part, information technology has emerged, and nowadays APCOM not only focuses on geostatistics and resource estimation, but has broadened its horizon to Information and Communication Technology (ICT) in the mineral industry. Mining Goes Digital is a collection of 90 high quality, peer reviewed papers covering recent ICT-related developments in: - Geostatistics and Resource Estimation - Mine Planning - Scheduling and Dispatch - Mine Safety and Mine Operation - Internet of Things, Robotics - Emerging Technologies - Synergies from other industries - General aspects of Digital Transformation in Mining Mining Goes Digital will be of interest to professionals and academics involved or interested in the above-mentioned areas.

ABC is like an iceberg, much of it hidden beneath the surface, yet capable of inflicting enormous damage to your organization, or more importantly, your business! With growing importance of IT to business operations we can no longer afford to have our ITSM improvement programs and initiatives fail because of Attitude, Behavior or culture issues. This book describes what ABC is, why it is important and gives practical cases and examples in dealing with ABC issues. The book contains more than 35 case examples from industry experts and practitioners on what they have done to solve specific ABC issues. The book can be used in combination with the ABC of ICT card set for creating awareness, assessing your own worst practices and taking your first practical steps in solving them. This book provides a valuable addition on top of ITIL publications on how to ensure ITSM improvement programs can and do deliver lasting value

This book constitutes the proceedings of the 20th International Semantic Web Conference, ISWC 2021, which took place in October 2021. Due to COVID-19 pandemic the conference was held virtually. The papers included in this volume deal with the latest advances in fundamental research, innovative technology, and applications of the Semantic Web, linked data, knowledge graphs, and knowledge processing on the Web. Papers are organized in a research track, resources and in-use track. The research track details theoretical, analytical and empirical aspects of the Semantic Web and its intersection with other disciplines. The resources track promotes the sharing of resources which support, enable or utilize semantic web research, including datasets, ontologies, software, and benchmarks. And finally, the in-use-track is dedicated to novel and significant research contributions addressing theoretical, analytical and empirical aspects of the Semantic Web and its intersection with other disciplines.
